He reported that in August 2002, the Development Services Department (DSD) had approved a Reuse and Permitting Master Plan Letter of Understanding which outlined a renovation approach for Code Compliance of the Friedrich Building. He noted that the Letter of Understanding stated that the building would remain fully equipped with fire sprinklers. He mentioned that the Letter of Understanding was no longer valid due to the Owner's lack of properly maintaining the structure and its safety systems. He added that the Friedrich Building had sustained significant structural damage and a majority of the building's fire sprinkler safety system was illegally shut off by the Owner.

Mr. Sanchez stated that since April 2010; the DSD had directed the Owner of the Friedrich Building to properly obtain permits, inspections, and Certificates of Occupancy for illegal building tenants and correct all applicable Code Violations or have tenants vacate the building. Due to the Owner's continued non-compliance; DSD issued a Notice to Vacate Order in March 2012. He indicated that in April 2012, the tenants requested more time to vacate due to business continuity concerns. In July 2012, DSD extended the deadline for building tenants to vacate to December 31, 2012. He stated that in October 2012, DSD found that the Owner illegally allowed two additional tenants to occupy the building without proper permits, inspections, and Certificates of Occupancy. He noted that the Owner submitted a Code Modification Request (CMR) in December 2012 to DSD requesting immediate occupancy and approval of a new overall plan for development. He explained that the CMR was based upon a Reed Fire Protection Engineering Report dated October 2012 that included several major errors. He reported that DSD denied part one of the CMR and approved in concept the proposed new development plan. He indicated that the Owner appealed to the Building Related and Fire Codes Appeals and Advisory Board in

May 2013 and was granted a 6-month continuance. In November 2013, the Building Related and Fire Codes Appeals and Advisory Board unanimously denied the Owner's request for approval of the CMR to allow immediate occupancy.

Mr. Sanchez reported that all tenants vacated the building in January 2013 and that the building was currently without any Certificates of Occupancy. He spoke of the major fire and life safety issues that remain since 2010 that prohibit occupancy to include: 1) Major structural damage; 2) Fire sprinkler system severely damaged with a large portion turned off; and 3) Inadequate exiting systems and fire wall separations. He stated that DSD and the Building Related and Fire Codes Appeals and Advisory Board believe that the Owner's proposed request to issue Certificates of Occupancy in the building's current condition did not meet the intent of the Code. He recommended that the City Council deny the Applicant's Appeal.

Ken Brown spoke on behalf of the Owner and stated that the building had been acquired in 1999. He indicated that the intent was to demolish a portion of it and rehabilitate the remainder as an Infill Project. He stated that they had implemented a rehabilitation process in 2000 and that there were sprinkler and fire protection issues identified. He noted that in 2002, various tenants moved into the facilities and utilized the building for eight years. He mentioned that in 2010, a portion of the structure had collapsed but was not related to the area of the facility that was being utilized by the tenants. He stated that there was damage to the sprinkler system which caused them to submit the CMR. James McKnight provided photos of the building and highlighted issues that had been addressed. He mentioned that their Fire Protection Expert, Architect, and Structural Expert believed that a portion of the building could utilize Alternative Methods to meet City Code Requirements.

Councilmember Taylor noted that she was confident in the due diligence and analysis performed by Development Services Staff and the Building-Related and Fire Codes Appeals and Advisory Board. She stated that she would approve the findings and uphold the decision of the Building-Related and Fire Codes Appeals and Advisory Board related to the Friedrich Building because the decision was supported by the findings.
