## **City of San Antonio Solid Waste Management Department Mobile Citation Project Delivered by Barcodes Inc.**

### **• Project Overview**

The City of San Antonio is requesting a mobile application that will provide them historical data of property solid waste infractions and allow them to issue a warning/ticket produced by an Inspector with a mobile handheld computer running Mobile Epiphany (ME) software. The mobile application will allow the inspector to see historical ticketing information and collect new information about current infractions via; pick lists, text fields, pictures and GPS locations on a Motorola MC75 custom configured by Barcodes Inc. The tickets will be printed at the office using Mobile Epiphany's PC based reporting tool and then for manually mailed to the offender.

Mobile Epiphany's goal is to deliver a working software solution based on our current understanding of your scope as per prior conversation. This scope shall not exceed

- A one day discovery meeting, conducted over video webinar.
- A process flow diagram to document the process and application proposed
- The 2 page Multi Family Inspections form
- The brush and bulky inspection form
- The recycling container inspection form
- A custom violation report for each of the 2 forms, including images and signatures if required in the report, which can be saved as a PDF.
- A single report, output as excel, for ingestion by a downstream system, using the format of columns as prescribed by San Antonio's needs for that system
- San Antonio agrees to work with Mobile Epiphany and Barcodes Inc to manage the scope of this project to stay within the budget of this proposal.
- Additional scope, if discovered during the discovery process, can be put off to future phases or purchased in addition this contract, if desired.

### **Engagement Requirements**

ME is an Application Configuration Platform and as such it is agreed that ME is not a subject matter expert in your industry for the purposes of implementation. A successful Custom Solution Development (and success in all subsequent phases of delivery and deployment) will require subject matter expertise being provided by representatives of the client.

ME has estimated professional services costs to the best of its ability and will be diligent in its duty to perform inside the scope of this proposal. Any extension to this scope and the services engagement required to deliver additional scope is entirely in clients control and must be requested and signed for in the form of an additional statement of work .

Therefore ME will provide a breakdown of all services provided and ME will provide a new proposal for customer approval if unforeseen additional services are required to complete the Custom Solution

Development. In such an instance, signatures by both parties will be required before additional services can be rendered.

Professional services beyond the scope of this proposal, including training, will be billed at the rate of \$165 USD an hour as per Barcodes Inc's GSA pricing.

Travel time and expenses relating to the completion of this proposal, for members of Mobile Epiphany, as requested by Client, is billable above the scope of this proposal. Clear records of travel time and expenses will be made available to the Client if travel becomes required. No travel expenses will be incurred without first receiving written permission from the Client (email acceptable).

This statement of work is valid for 90 days from its presentation to client; it has been prepared using the most current information. It may be subject to future changes, such as but not limited to, changes in labor or equipment costs, vendors and/or customer requests. All changes will be noted in writing and provided to the Client for approval prior to being considered part of this agreement.

The following definitions will be used to describe the software process milestones for this proposed project

**Alpha** release refers to the first iteration of a software process, which can be tested by the client's chosen testers on Mobile Epiphany software. Testing of the Alpha release shall only be for the purpose of ongoing debugging and minor change requests prior to the second iteration. The Alpha release does not contain within it all the functioning features of the intended process, and is released for the purpose of meaningful initial testing by the client. Alpha test is scheduled for no more than 2 weeks. The purpose of alpha is to approve or request changes of the overall flow of the forms.

**Beta** release refers to the second iteration of a software process, which can be tested by the client's chosen testers on mobile epiphany's software. Testing of the Beta release shall only be for the purpose of debugging and minor change requests prior to the third and final version release. The Beta release to the client is a version containing all the features and functions scoped in the designated process, but for which defects are potentially still present.

**Final** (aka Process Lockdown) release refers to the final version of a software process to be delivered to the client that meets the scope and intent of the design as set forth in the scoping proposal. This is also referred to as "process Lockdown". Only once lockdown is achieved can reports be written. Any requests to change the application after lockdown may result in a new statement of work and new estimated costs.

Delivery of reports after Process lockdown constitutes the end of the project.

- **Deliverables**

- Phase I (application creation)
  - Swim Flow Diagram from the 1 day Business Analysis Workshop that will document details of your requirement.

INFORMATION FOR ORDERING ACTIVITIES  
APPLICABLE TO ALL SPECIAL ITEM NUMBERS

SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service ([www.FAS.gsa.gov](http://www.FAS.gsa.gov)). The catalogs/pricelists, GSA Advantage!™ and the Federal Acquisition Service Home Page ([www.FAS.gsa.gov](http://www.FAS.gsa.gov)) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.
