ATTACHMENT A

THREE-YEAR MUNICIPAL ANNEXATION PLAN

The adoption of a Municipal Annexation Plan begins a three- year annexation process on the effective date of the adoption of the plan. Prior to the ninetieth day following the effective date of adoption, the City must notify each property owner in the affected area and each of the public or private entities that provide municipal services. In addition, the plan must be posted in the City's internet website.

Notification to area service providers must include a formal request for information regarding the types and levels of services currently being provided. A comprehensive inventory of services and facilities is then derived from the information provided from each of the public or private entities. If a service provider fails to submit the required information within 90 days of receiving notification, the City is not obligated to include that information in its inventory. The following types of information would be required:

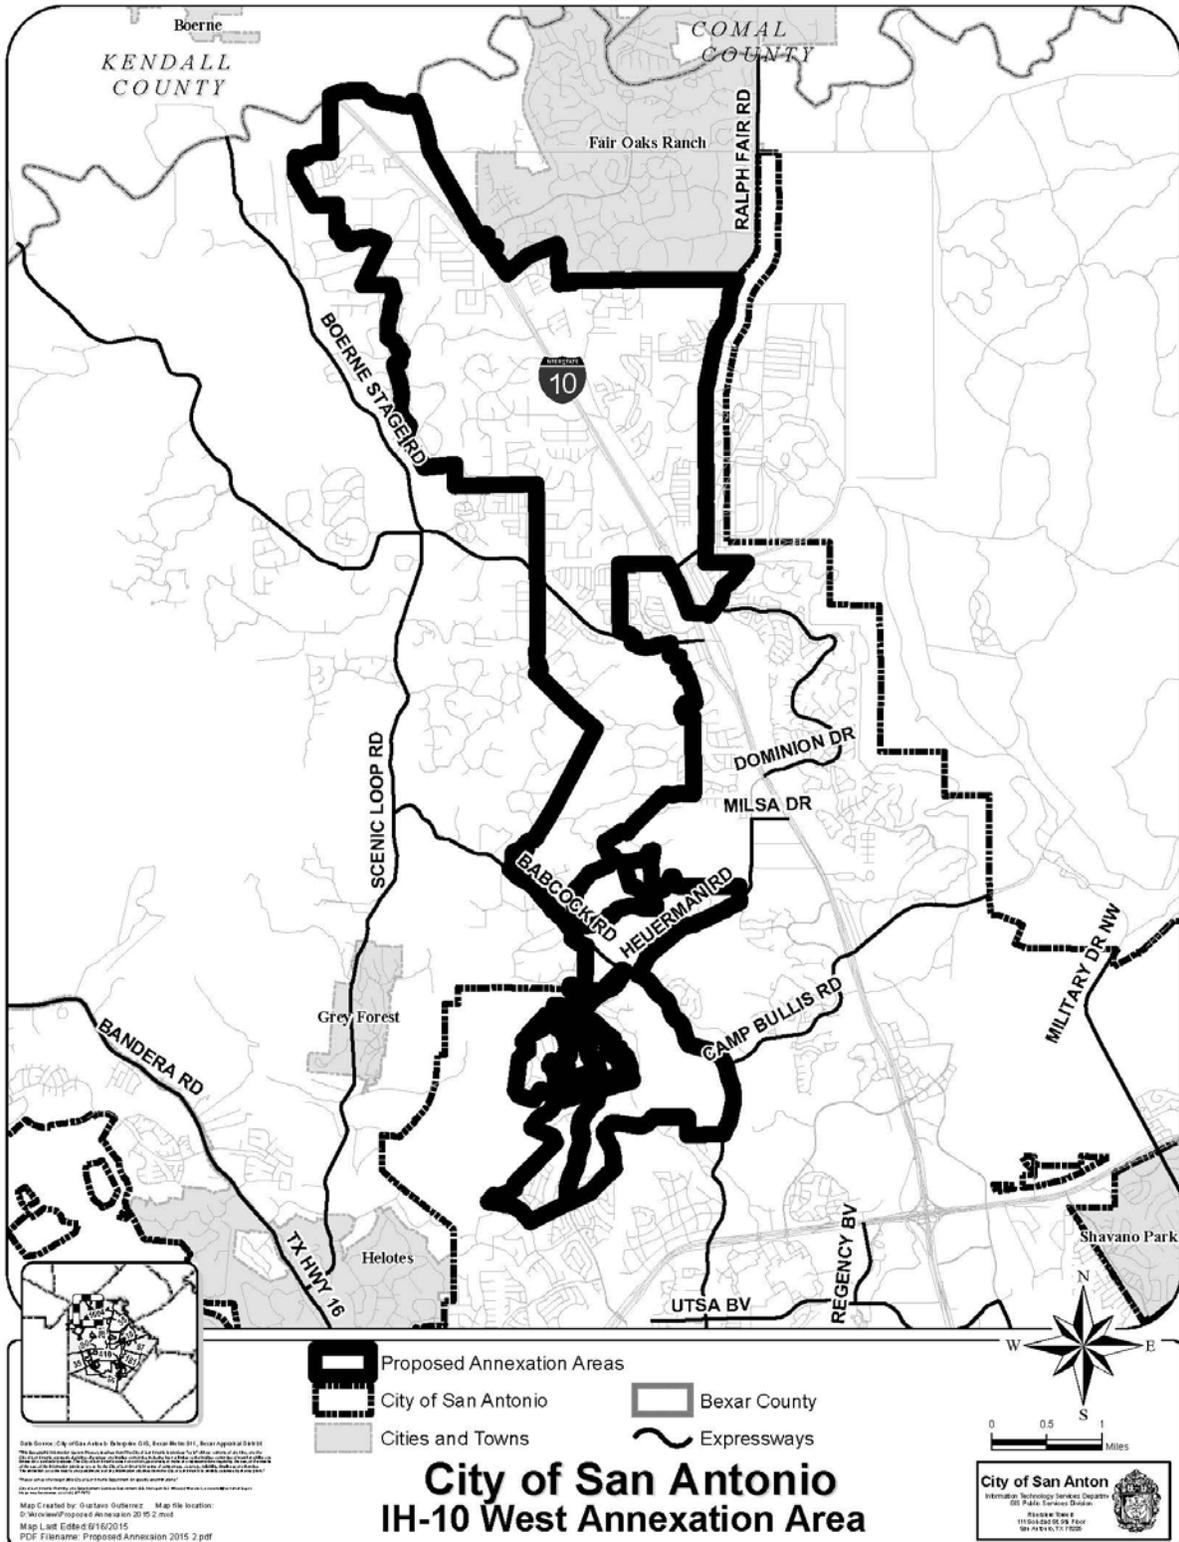

- For infrastructure facilities and maintenance,
 - An engineering report that describes the physical condition of all infrastructure elements in the area.
 - A summary of expenditures for that infrastructure.
- For critical services (fire, police and emergency medical services),
 - Average dispatch and delivery times.
 - Equipment schedules.
 - Staffing schedules including certification and/or training levels.
 - A summary of operating and capital expenditures.

The inventory then becomes a basis for determining levels of service to be provided under an annexation area service plan. The City may monitor the services provided in an area proposed for annexation and verify the inventory information provided by the service provider. Only those services provided in the year proceeding the date of plan adoption are to be included in the inventory. Once the inventory is complete, it must be made available for public inspection.

The City must conduct two annexation public hearings within 90 days of making the inventory available for public review. A preliminary service plan must be presented and explained at each of the hearings. After completing those hearings, the City of San Antonio must then negotiate for those services to be included in the final service plan with five appointed representatives. The final service plan must be completed prior to the first day of the tenth month following completion of the inventory of services.

The annexation must then be completed before the 31st day following the third anniversary of inclusion in the plan. If the process is not completed within that time frame, the City may not annex that area for five years.
