2.2 Acceptance of the final plans by City shall not constitute nor be deemed a release of the responsibility and liability of Firm, its employees, associates, agents or Sub-Consultants for the accuracy and competency of their designs, drawings, specifications or other documents and Services; nor shall such acceptance be deemed an assumption of responsibility or liability by City for any defect in the designs, working drawings, specifications or other documents and work prepared by said Firm, its employees, sub-consultants and agents.

2.3 Firm warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for Firm, to solicit or secure this Agreement, and that it has not, for the purpose of soliciting or securing this Agreement, paid or agreed to pay any company or person a commission, percentage, brokerage fee, gift or any other consideration contingent upon or resulting from the award or making of this Agreement. For a breach of this warranty, City shall have the right to terminate this Agreement under the provisions of **Article XIII** herein.

**ARTICLE III.  
BASIC SERVICES**

3.1 Firm shall not commence performance of any services on this Project until being thoroughly briefed on the scope of the Project and being notified by City in writing to proceed. The scope of the Project and Firm's required services shall be dependent on Firm's review of City's criteria and the development of a Proposal by Firm to define the services based on this Agreement, as well as a complete understanding of the goals of City for this Project. Should the goals of the Project subsequently and significantly change, either Firm or City may request a review of the anticipated services, along with an appropriate adjustment in compensation. Any work performed by Firm, prior to the receipt of a written Notice to Proceed issued by City, will be performed at Firm's own risk.

3.2 All work performed by Firm hereunder shall be performed to the satisfaction of the Director. The determination made by Director shall be final, binding and conclusive on all Parties hereto. City shall be under no obligation to pay for any work performed by Firm, which is not satisfactory to Director. City shall have the right to terminate this Agreement, in accordance with Article XIII. Termination, in whole or in part, should Firm's work not be satisfactory to Director; however, City shall have no obligation to terminate and may withhold payment for any unsatisfactory work, as stated herein, even should City elect not to terminate.

3.4 Firm shall not be reasonable for delays in meeting deliverable deadlines that may result due to causes beyond Firm's reasonable control, provided Firm notifies City in writing at least fifteen (15) days prior to any such deadline. The City may authorize additional calendar days or make adjustments to the

Process Schedule and related deliverables, within the existing scope of this Agreement, upon mutual Agreement in writing, between the Director and Firm, as to the unreasonableness of said additional time or adjustment.

3.5 Firm shall render the professional services described in this **Article III** and in **Exhibit A** necessary for the development of the Project to Substantial Completion, as acceptable to the Director and subject to other provisions of this Agreement.

3.6 Firm shall coordinate its services with those services provided by City and City's Consultants. Firm shall be entitled to rely on the completeness of services and information furnished by City.

All computer models, databases and spreadsheets developed herein (written and digital formats) are due on the same date as the final product or deliverable.

3.9 If Firm is required to submit hardcopy submittals, Firm also shall provide the hardcopy submittal, such as final documents and related materials, in a digital format. This digital deliverable shall, to the extent feasible, be assembled into one file rather than separate files for text, tables, graphics, etc. This digital deliverable shall be contained on a CD(s) or DVD(s), and shall be in both Word and Adobe Acrobat format. Any plates, figures, etc., not suitable for Word, shall be in AutoCAD, ArcGIS, Adobe Acrobat or compatible format.

Any further services shall be negotiated, agreed upon and added to this Agreement by a written amendment executed by both parties.

5.2 Further services may be provided after the execution of this Agreement without nullifying the Agreement. If further services are required to redraw or redesign caused by City's decision to change the scope or redirect the goals after drawings have been completed and Firm will be charging City for these

additional services, Firm shall agree to work on an hourly basis to complete the services. If City elects to add scope and increase the services provided by Firm, there shall be an agreement between the Parties to change the scope and an agreement reached for additional fees, if any. If additional compensation is negotiated for these requested increased services, that compensation shall be added to the Final Compensation and paid to Firm after a written amendment incorporating such services into the Agreement has been executed by both parties. Any further services which Firm negotiates to charge City will be provided on a not-to-exceed basis and set out in a written amendment approving such services.

Within ten (10) calendar days from the occurrence of any event, for which time for performance by Firm shall significantly be extended under this provision, Firm shall give written notice thereof to City, stating the reason for such extension and the actual or estimated time thereof. If City determines that Firm is responsible for the need for extended time, City shall have the right to make a Claim, as provided in this Agreement.

The Schedule shall include all services to be performed and also shall include Additional Services and Reimbursable which make up the Total Compensation. 11.4 Firm shall, within ten (10) calendar days following receipt of Compensation from City, pay all bills for services performed and furnished by others in connection with the Project and shall, if requested, provide City with evidence of such payment. Upon receipt of such written notice of default, the party in receipt shall have a period of ten (10) calendar days to cure any failure to perform under this Agreement. Upon the completion of such ten-day period, commencing upon receipt of the notice of termination, if such party has not cured any failure to perform, such termination shall become effective without further written notice.

13.2 City reserves the right to terminate this Agreement, for reasons other than substantial failure by Firm to perform, by issuing a signed, written notice of termination (citing this **Section 13.2**), which shall take effect on the twentieth (20<sup>th</sup>) day following receipt of said notice and upon the scheduled completion date of the performance phase in which Firm then currently is working, whichever effective termination date occurs first.

13.3 City reserves the right to suspend this Agreement for the convenience of City by issuing a signed, written notice of suspension (citing this **Section 13.3**), which shall outline the reasons for the suspension and the expected duration of the suspension, but such expected duration shall in no way guarantee what the total number of days of suspension will occur. Within thirty (30) days after receipt of such notice of termination (unless Firm successfully has cured a failure to

perform), Firm shall submit a statement showing in detail the services performed under this Agreement prior to the effective date of termination. City shall have the option to grant an extension to Firm of the time period for submittal of such statement.

13.5.2 Copies of all completed or partially completed specifications and all reproductions of all completed or partially completed designs, plans and exhibits, prepared pursuant to this Agreement prior to the effective date of termination, shall be delivered to City, in the form requested by City, as a pre-condition to payment by City to Firm of final Compensation.

13.5.3 Upon the above conditions being met, City promptly shall compensate Firm that proportion of the prescribed fee which the services actually performed by Firm, pursuant to this Agreement, bear to the total services called for under this Agreement, less all previously paid Compensation.

13.5.4 City, as a public entity, has a duty to document the expenditure of public funds. Firm hereby acknowledges this duty on City. To this end, Firm understands the failure of Firm to comply with the submittal of the statement and documents, as required herein, shall constitute a waiver by Firm of any and all rights or Claims to compensation for services performed by Firm, pursuant to this Agreement.

13.6 The procedures which Firm is to follow upon Receipt of Notice of Suspension are:

13.6.1 Upon receipt of written notice of suspension, which the date also shall be the effective date of the suspension, Firm shall, unless the notice otherwise directed, immediately begin to phase-out and discontinue all services in connection with the performance of this Agreement and promptly shall proceed to suspend all existing orders and contracts, insofar as such orders and contracts are chargeable to this Agreement.

13.6.4 In the event that Firm exercises its right to terminate one hundred twenty (120) days after the effective suspension date, within thirty (30) days after receipt by City of Firm's notice of termination, Firm promptly shall cancel all existing orders and contracts, insofar as such orders and contracts are chargeable pursuant to this Agreement, and shall submit the above referenced statement showing in detail the services performed pursuant to this Agreement, prior to the effective date of suspension.

13.6.5 Any documents prepared in association with this Agreement shall be delivered to City as a

pre-condition to final payment.

- 13.6.7 City, as a public entity, has a duty to document the expenditure of public funds. Firm hereby acknowledges this duty on City. To this end, Firm understands that the failure of Firm substantially to comply with the submittal of the statements and documents, as required herein, shall constitute a waiver by Firm of any portion of the fee for which Firm did not supply such necessary statements and/or documents.

**CITY OF SAN ANTONIO  
PARKS AND RECREATION SYSTEM STRATEGIC PLAN  
(PROJECT NO.)**

**I. BACKGROUND**

The City of San Antonio Parks and Recreation Department invites qualified individuals or firms to submit their experience, qualifications and a proposal for the development of a comprehensive 10 Year Parks & Recreation System Strategic Plan related to the future delivery of Parks and Recreation services, including an assessment of the City's existing Urban Forestry programs, for the City of San Antonio.

**Strategic Plan**

The City of San Antonio, Texas is the seventh largest city in the country with an estimated population of 1,436,697. The San Antonio Parks and Recreation System includes more than 240 City-owned parks including swimming pools, gymnasiums, historic cemeteries, sports facilities, recreation centers and the Botanical Gardens and Conservatory. Additionally, the system includes 15,338 acres of parkland, including more than 150 miles of walking, hiking and biking trails.

The Parks and Recreation System also includes programming and activities for all ages from pre-school to senior citizens and offers programs in athletics, fitness, arts, dancing, nature and science, and swimming.

Currently the Parks & Recreation System Strategic Plan 2006-2016 provides the programmatic and operational guidelines and strategies to deliver all services, as well as growth strategies, and facilities improvements. The Parks System has a long history of maintaining an active Strategic Plan which includes the first plan in 1932, and update in 1964, as well as updates in 1980, 1981, 1999, and the current plan that is being used today.

The Parks and Recreation Department is now seeking to update the System Strategic Plan of 2006-2016. Specific plan elements are identified in the Scope of Services.

**Urban Forestry Program**

Since 2006-07, the Parks and Recreation Department began implementation of tree related programs associated with funding generated through the City of San Antonio's Tree Canopy Preservation & Mitigation Fund.

The funding that is generated can be used for specific purposes related to the purchase of new trees; equipment purchases, rentals, and watering in support of planting, establishing, and maintaining trees; providing education and conducting community outreach efforts around trees; and the purchase of supplies needed for trees.

One of the primary strategies undertaken for the last several years focused on a Parks Tree Planting Initiative primarily within city parks and some downtown locations and operations to support newly planted trees.

This is complemented by a community outreach component that includes several tree adoption and volunteer tree planting events conducted throughout the community. The Department has also partnered with local stakeholder groups in an effort to promote large scale tree planting projects and augment its current efforts. A compilation of these strategies has resulted in approximately 20,000 new trees being planted across the park system and distributing almost 25,000 new trees or funding rebates for trees to citizens.

**II. SCOPE OF WORK**

The City desires to engage the services of a professional planning firm to develop a plan and design for the 10 year System Strategic Plan for the department of Parks and Recreation.

The Scope of Services for this project shall include but are not limited to the following items:

# Parks and Recreation System Strategic Plan

## Scope of Work

The scope of work described below corresponds to the five tasks outlined in the RFQ, with technical descriptions of each subtask required to address the required deliverables.

### Task 1: Planning Context

#### 1.1 - Project Initiation Meeting

The BWCD Team will meet with the City's Project Manager and any members of City's project team to refine plans for the project, including schedule, roles and responsibilities, communication protocols, public engagement and logistical issues in order to tailor and refine the planning process. As part of this task, the BWCD Team will prepare a consolidated request for information and submit it to the City's Project Manager.

#### 1.2 - Public Engagement and Communication Plan

The BWCD Team will develop a detailed plan for public participation activities and project communications that will be implemented in each task of the project, defining specific roles and responsibilities for the BWCD Team and the City. Outreach methods, tools, and timing will be defined, and will focus on both high-tech and high-touch methods of interacting with the public. The Plan is intended to set the goals and performance measures, with adjustments anticipated to the deployment of the specific tools as the project progresses as the project team adapts meet the stated goals. The public engagement plan will identify target audiences, with a focus on those who have not been engaged in previous recent planning efforts. We will also define the ways in which collected input will be shared with staff and the PRAB, released to the public and used in the development of the plan.

A key step in this task is to design branding for the project, creating a consistent look and feel for materials that clearly communicates the identity of the project. Another key step is the establishment of a project-specific webpage hosted by the City on its website. This page will be identified with the project branding and cross-linked to other parks and recreation sites and relevant social media accounts. We will provide initial content including a description of the Strategic Plan project, a frequently asked questions (FAQ) sheet, and a contact and comment form or email address.

The Public Engagement and Communication Plan document will be provided electronically for one round of consolidated comments by the City staff team and then revised by the BWCD Team.

#### 1.3 - PARD Staff Kickoff Meeting

The BWCD Team will facilitate an orientation meeting with PARD staff, developing an agenda for an interactive staff session. This meeting will include an overview of the process and schedule, presentation of the Public Engagement and Communication Plan, and discussion of strengths, challenges and opportunities. We will develop the agenda, facilitate the meeting, and prepare a meeting summary.

#### 1.4 - PRAB Meeting

The BWCD Team will attend a regularly scheduled PRAB meeting to provide an overview of the Strategic Plan process and the Public Engagement and Participation Plan, and to get preliminary input from PRAB members on issues and opportunities.

#### 1.5 - Previous Plans, Research and Studies

Based on our team's extensive knowledge of the local situation, we will prepare a summary memo of the critical recent planning efforts, research and studies that are available from The City of San Antonio that relate to the delivery of parks, recreation, cultural and leisure services, including but not limited to: annual reports, brochures, relevant sections of the San Antonio Tomorrow's Comprehensive Plan, Transportation Plan, Sustainability Plan, parks and recreation System Strategic plans, policies, and other pertinent city wide planning studies and identify preliminary issues that will be important to the Strategic Plan process. We will provide a PDF file to the City for review and revise the memo based on one set of consolidated comments.

# Parks and Recreation System Strategic Plan

## **1.6 - Demographic Analysis**

Using our team's knowledge of demographic and development trends gained from the Comprehensive Plan effort, we will develop a targeted demographic analysis that identifies population citywide and planning area characteristics such as age, ethnicity, race, and income. The Team will also analyze key changes since the last plan that influence the provision of parks and recreation services. We will identify land use and development characteristics, focusing on areas where population growth is anticipated given the Comprehensive Plan. We will also develop population projections, identifying future population figures for use in the Needs Analysis.

## **1.7 - Trends Analysis**

The BWCD Team will prepare a summary of trends locally, regionally and nationally, identifying those trends with the greatest relevance to San Antonio's context as well as key recreation trends. The Team will develop a presentation of best practices and case studies from providers across the country. The presentation will be image-focused, providing an engaging view into what is achievable, while also providing information on how it is accomplished. We will provide a PDF file to the City for review and revise the document based on one set of consolidated comments.

## **1.8 - Policy Review**

The BWCD Team will evaluate existing PARD policies in light of Tasks 1.5, 1.6 and 1.7, identifying needed policy changes, areas where new policy may be needed, and areas of overlap or inconsistency. We will provide a PDF file to the City for review and revise the document based on one set of consolidated comments.

## **1.9 - Project Management and Administration**

Our Project Management Team will coordinate with San Antonio's Project Management Team throughout the project, including bi-weekly project management teleconferences for the duration of the project, supplemented by in-person project management team meetings. This task also includes preparation of monthly written progress reports.

## Task 2: Existing Programs & Facilities Analysis

### **2.1 - Parks, Open Space and Facilities Inventory**

The BWCD Team will use City GIS data to create a digital base map illustrating the City's boundary and contextual area, planning areas, existing parks and open space, major recreation facilities, and trails. As part of this task, we will identify other parks and recreation resources using available data. We will further review and analyze the City's inventory to cross-check park classification and facility counts. This product will result in an update of the inventory, linking it spatially to the GIS park data.

As part of this task, BWCD Team members will tour City-selected representative parks and recreation facilities over a 2-day period, accompanied by City planning, recreation, and maintenance staff. The tour will provide an opportunity to discuss strengths and challenges of the park system at representative sites and discuss issues such as operations, planned development or improvements, and maintenance.

Following the tour, the BWCD Team will evaluate the City's Parks and Recreation facility condition to develop and apply a condition rating to each site.

The base map and inventory will be used for all subsequent analysis and planning. The BWCD Team will provide a draft inventory and base map for City review, revising these materials based on one set of consolidated edits.

### **2.2 - Urban Forestry Program Assessment**

The BWCD Team will evaluate the City's urban forestry programs, policies and practices, working in collaboration with San Antonio's staff. The BWCD Team will facilitate an interdepartmental staff workshop including representatives from all relevant City departments involved with the regulation, planting, management, and maintenance of trees in parks and public spaces. The focus of this workshop will be to

## Parks and Recreation System Strategic Plan

identify a vision for San Antonio's urban forest and evaluate current policies and practices in light of the vision.

Following the workshop, the BWCD Team will prepare a draft vision and mission with potential goals, accompanied by a case studies and best practices review. This document will be provided to staff and will serve as the background for a second urban forestry workshop. We will facilitate a second urban forestry workshop structured to develop objectives, policies and practices for urban forestry. We will then develop a draft Urban Forestry Strategic Plan and submit it for City staff review.

### **2.3 - Facilities Mapping**

The BWCD Team will evaluate access to park land through a technical analysis using ArcGIS Network Analyst™. The geographic model will be based on actual paths of travel including trails, and physical and psychological barriers (busy streets, missing crossings). This task will provide a visualization of gaps in service based on the physical reality and walking distances. The geographic service reach will consider all ways that park users actually travel to park land or facilities of different types, functions or characters, including walking, cycling, by car and by transit, using the existing transportation networks. A service area for each site will be depicted graphically, highlighting gaps. Land owned by other entities, such as schools or other agency's parks, will be included in the analysis based on available data.

In addition, the BWCD Team will evaluate access to recreation facilities and experiences. We will evaluate the service area of each site, identifying potential ways to increase the size of the area served by improving access.

We may also assess the capacity of park land or recreation facilities based on land use assumptions, maximum park visitor capacity and projected population densities, incorporating geographic, zoning and population factors into the analysis. This allows the park system and planned park system to be viewed through another lens, providing additional depth to the analysis and allowing for quick evaluation of different scenarios.

Prior to conducting the analysis, the BWCD Team will develop a memo recommending the specific analysis criteria and assumptions. City feedback will be incorporated and our team will prepare the analysis. The result will be a visual depiction of service areas, gaps in service, and partially served areas. The analysis results will be provided to the City in a format which can be explored by staff in detail using Google Earth. This document will be finalized based on staff comments, and will be used in Task 4 as a basis for identifying recommendations to enhance the urban forest throughout the park system.

### **2.4 - Programs Analysis**

The BWCD Team will develop a Programs and Services Inventory to summarize community and recreation programs and services in San Antonio, focusing on City-provided services but also addressing other agency and non-profit providers. Based on available existing information, this may include other agencies, non-profits. We will then analyze existing program data, including program registration data, cost and revenue data, and customer satisfaction data to evaluate current program offerings.

### **2.5 - Existing Parks, Facilities & Programs Summary Report**

The BWCD Team will prepare an Existing Parks, Facilities and Programs Summary Report that summarizes all of the analysis completed in Task 2. We will provide an outline of the report to San Antonio's Project Manager for review and approval prior to preparing the report. This report will classify and summarize the inventory of parks, open space, and trail system; present key findings of the geographic assessment conducted in Task 2.3, and summarize major findings of the recreation program analysis. This report will also summarize how park and recreation services are provided in San Antonio, identify major responsibilities and areas of service provision, and evaluate the costs of providing park and recreation services, as well as the funding streams used for operations and capital projects. The BWCD Team will provide a PDF file to the City for review and revise the report based on City comments.

### **2.6 - Project Management and Administration**

## Parks and Recreation System Strategic Plan

The BWCD Project Management Team will continue to coordinate with San Antonio's Project Management Team throughout this task.

### Task 3: Needs Analysis

#### 3.1 - Staff Input Focus Groups (3)

The BWCD Team will conduct three focus groups with San Antonio staff regarding needs and potential service enhancements. These focus groups will be scheduled to occur on a single day, with two focus groups primarily aimed at PARD staff and the third designed as an interdepartmental session. The BWCD Team will design the agenda, facilitate the focus groups and summarize results.

#### 3.2 - Public Input Process

The BWCD Team will conduct a public input process that uses a mix of methodologies and techniques, as specified in the Public Engagement and Communication Plan developed in Task 1.2. A combination of methods with opportunities for both English and Spanish speaking attendees and respondents will be included:

- **Stakeholder interviews**, in person or telephone interviews of individuals or small groups of two to three to identify issues and discuss perceived needs. Stakeholder interviews allow for in-depth discussion and provide a means for interviewees to address potentially sensitive topics more candidly than they might in an open forum.
- **Focus groups** organized by geography or around topics or interest areas, such as organized sports, cultural arts or trails.
- **Community Intercepts/pop-up feedback sessions**, where we extend the planning process to the community by bringing an interactive outreach activity to existing events or high traffic locations.
- **Interactive workshops/ Public Meetings (10)**, including visual preference polling, mapping activities or trade-off games. It is assumed that workshop/public meetings will be conducted at City of San Antonio facilities without charge to the project.

In-person workshop activities will be designed to be extended into an online format, further extending participation opportunities.

Workshops eight (8) will be held at the start of the process to solicit input from all sectors of the city.

Two (2) additional public meetings will be held toward the end of the process to review progress and to present the final product.

#### 3.3 - Statistically Valid Survey (Optional – Not Recommended in Base Scope)

A statistically valid survey utilizes a sample of the population to test questions that can then be generalized to the population with a specific margin of error. The BWCD Team will administer a survey to gain insights into needs and priorities.

#### 3.4 - Online Survey

The BWCD Team will develop an open-access online survey (in English and Spanish) to gather feedback from residents, as well as the business community. This online survey will give all interested parties a voice in the planning process (not limiting participation to those selected for the survey conducted in Task 3.3), allowing people to participate at their convenience. This outreach tool will provide important feedback regarding recreation participation, priorities and needs. The number of responses to the online survey is only limited by the outreach efforts; with participants providing information directly into the system there is little cost difference between reaching 200, 400 or even 1,000 residents. We will program the online survey, work with the City to publicize it and analyze the results, including a brief memo summarizing key findings.

#### 3.5 - Benchmarking

The BWCD Team will create a benchmarking comparison to compare San Antonio to other peer cities, identifying the comparable cities and the specific comparisons (e.g., park acreage, budgets, services) for City review and approval prior to conducting the analysis. The results of this task will be incorporated into the Opportunities Analysis document

## Parks and Recreation System Strategic Plan

developed in Task 3.6.

### **3.6 - Opportunities for Service Enhancements**

This task will focus on how to maximize community value of San Antonio's park system. It will be based on a robust technical analysis that incorporates community values and qualitative factors identified through the community engagement process. In this task, the BWCD Team will analyze opportunities, incorporating findings from the public involvement process, the existing system analysis, trends, geographical analysis and demographic analysis. We may also identify opportunities by assessing the capacity of park land or recreation facilities to accommodate new elements, based on land use assumptions, maximum park visitor capacity and projected population densities, incorporating geographic, zoning and population factors into the analysis. Analysis findings will include graphics, maps and tables as well as narrative. The BWCD Team will create a draft of the Opportunities Analysis Summary Report, provide a PDF for review, and finalize it after obtaining staff and PRAB feedback.

### **3.7 - PRAB Meeting**

The BWCD Team will attend a regularly scheduled PRAB meeting to present the results of all tasks to date.

### **3.8 - Project Management and Administration**

The BWCD Project Management Team will continue to coordinate with San Antonio's Project Management Team throughout this task.

## Task 4: Physical Planning & Recommendations

### **4.1 - Preliminary Systemwide Policies & Recommendations**

The BWCD Team will prepare preliminary recommendations and policy changes applicable to the entire park system, addressing parks, greenways, land acquisition and recreation programming.

### **4.2 - Park and Facility Improvement Recommendations**

The BWCD Team will develop recommendations for each existing site, including a recommended program of activities. This will be presented as a flexible, updatable, spreadsheet model of the costs implications for recommended projects. The model will clearly state the assumptions for each type of park intervention and provide a high-level look at the capital, as well as ongoing operating, costs for improvements at each park in the system. This model will be updated and revised based on feedback from staff and then incorporated into the administrative draft plan.

### **4.3 - Capital Improvement Project Priorities**

The BWCD Team will develop a prioritization methodology and facilitate a prioritization process with staff to identify near-term and longer term CIP programs.

### **4.4 - Online Prioritization Exercise**

The BWCD Team will design and implement an online community exercise that challenges participants to prioritize potential projects, in a game-like format. This exercise is both an important point of input about which projects should come first and an educational opportunity for the community about the variety of needs that parks and recreation balances in capital and operations budgets. The BWCD Team will design, program and administer the online exercise, monitoring results and providing advice on maximizing outreach. Following an initial push and one major reminder, the results will be pulled and summarized to inform the administrative draft plan.

### **4.5 - Outline Strategic Plan Summary Report**

The BWCD Team will prepare a detailed summary of the Strategic Plan recommendations, incorporating the results of Tasks 4.1-4.3. This work product will also present an outline of the Strategic Plan document and a proof of the document format for review by the PRAB and staff. Prior to beginning the preparation of the Administrative Draft Master Plan, we will finalize the outline and document format based on City feedback.

### **4.6 - Project Management and Administration**

## Parks and Recreation System Strategic Plan

Our Project Management Team will continue to coordinate with San Antonio's Project Management Team throughout this task.

### Task 5: Draft and Final Reports

#### **5.1 - Administrative Draft System Strategic Plan**

The BWCD Team will prepare an administrative draft of the System Strategic Plan for internal staff review, to allow review and refinement prior to public release of the document. The draft document will be provided in PDF format, with a comment tracking form to facilitate staff review.

#### **5.2 - Draft System Strategic Plan**

Following staff comment on the Administrative Draft System Strategic Plan, the BWCD Team will revise and assemble the document for public release. This task also includes the development of messages summarizing the importance of this plan (for use on the website and in press releases). The Public Draft System Strategic Plan will be provided in a web-friendly PDF file for ease of distribution.

#### **5.3 - Presentation of the Draft System Strategic Plan**

The BWCD Team will present the draft Strategic Plan at a public media release to PARD staff and the PRAB. We will also support a public review process that includes both in-person and electronic review and feedback opportunities. We will provide materials (presentation, staff report assistance, etc.) and support for review meetings necessary for plan adoption.

#### **5.4 - Final System Strategic Plan**

Following the completion of the review process, the BWCD Team will complete final revisions to the documents and provide high quality print-ready PDF files, compiled web-friendly PDF files and a complete package of source files and interim materials.

#### **5.5 - Final Presentation**

The BWCD Team will present the final plan to the Planning Commission and to Council, attending one meeting with each.

#### **5.6 - Project Management and Administration**

Our Project Management Team will continue to coordinate with San Antonio's Project Management Team throughout this task.

### Assumptions:

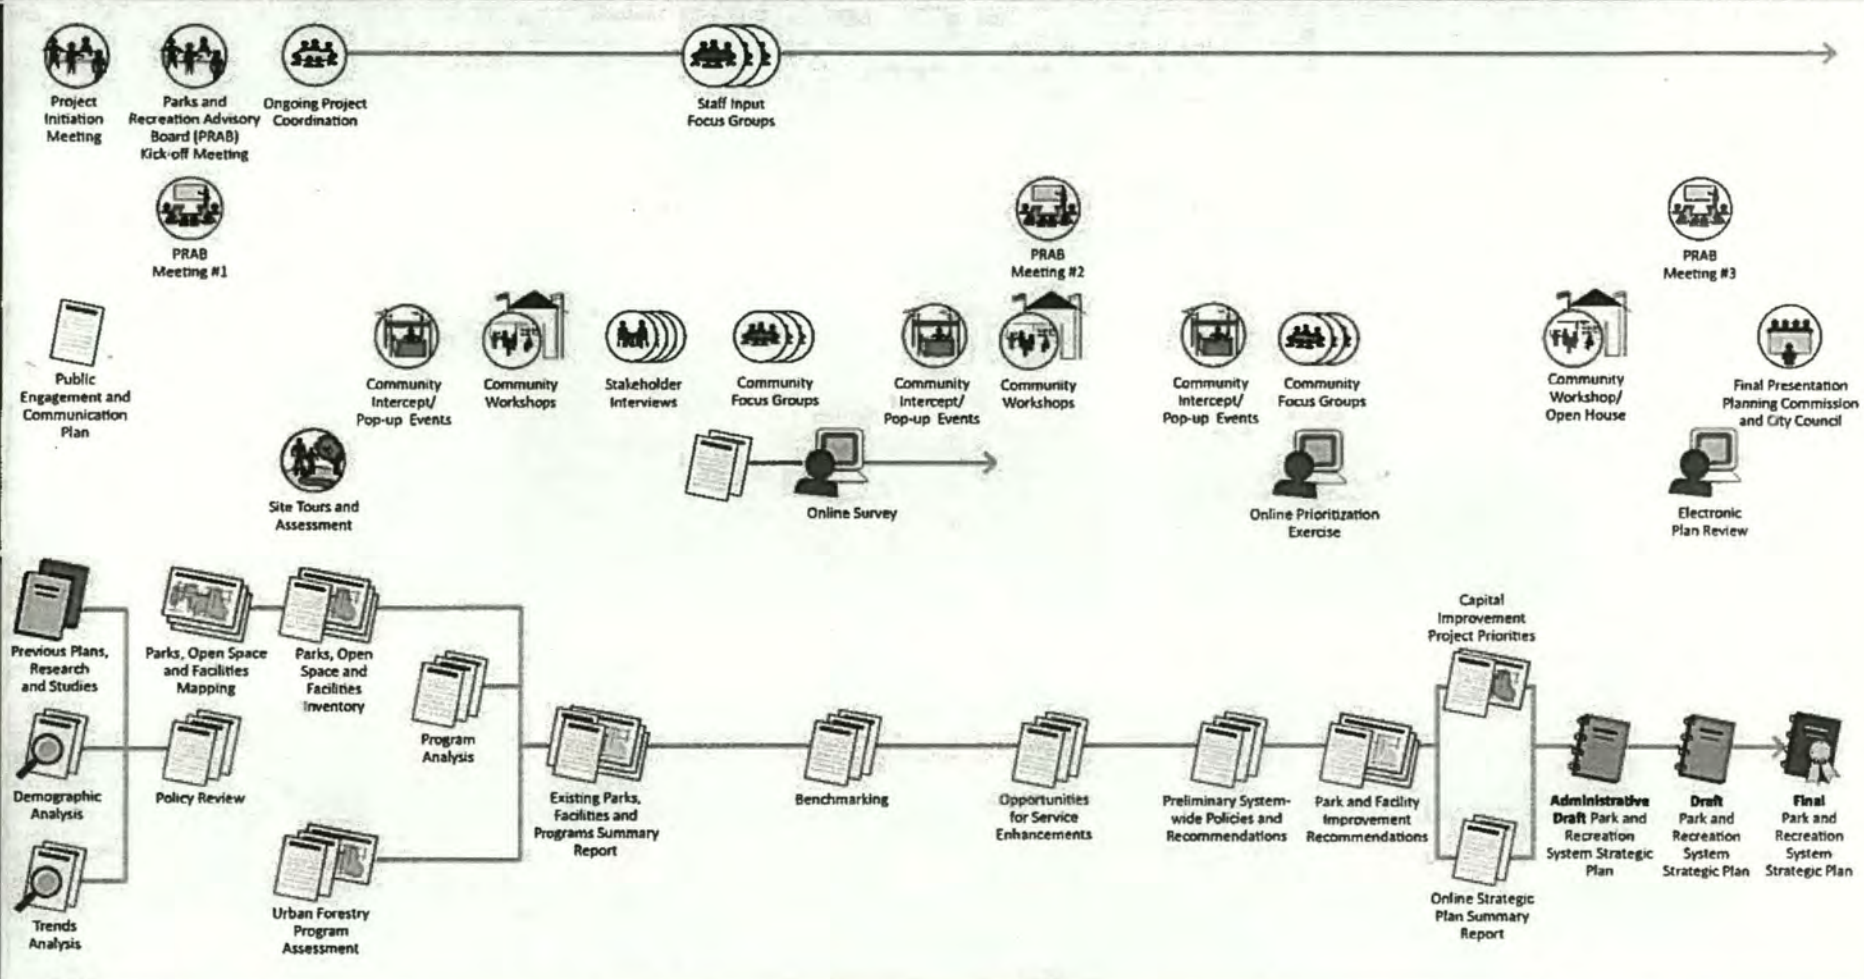

- City secures venues and covers any cost associated with site rental, AV equipment, and copies for public meetings; The BWCD design team would like to be able to "approve" the site.
- City provides at least three (3) admin level staff for registration and set-up/break down at all public meetings.
- BWCD Team will provide at least one staff person for translation services at all public meetings.
- BWCD Team will secure all media buys for outreach and notice of public meetings. A lump sum amount of \$20,000.00 is identified in the fee schedule for this item. If costs are more they will be prior approved by the City before expenditures are made.
- City uses Nextdoor and/or other means to inform the community of the meetings.
- City will leverage the team's outreach efforts by coordinating with other Park's and Council District events where possible.
