

HISTORIC AND DESIGN REVIEW COMMISSION

February 15, 2017

HDRC CASE NO: 2017-020
ADDRESS: 115 W ASHBY PLACE
LEGAL DESCRIPTION: NCB 1885 BLK LOT 6
ZONING: RM-4, H
CITY COUNCIL DIST.: 1
DISTRICT: Monte Vista Historic District
APPLICANT: Tom Stolhandske
OWNER: Ada Yrizarry
TYPE OF WORK: Rear fence alterations
REQUEST:

The applicant is requesting a Certificate of Appropriateness for approval to place wrought iron spikes 20 inches above the top of the fence. The space between the spikes to be 6”.

APPLICABLE CITATIONS:

Historic Design Guidelines, Chapter 5, Guidelines for Site Elements

2. Fences and Walls

A. HISTORIC FENCES AND WALLS

- i. *Preserve*—Retain historic fences and walls.
- ii. *Repair and replacement*—Replace only deteriorated sections that are beyond repair. Match replacement materials (including mortar) to the color, texture, size, profile, and finish of the original.
- iii. *Application of paint and cementitious coatings*—Do not paint historic masonry walls or cover them with stone facing or stucco or other cementitious coatings.

B. NEW FENCES AND WALLS

- i. *Design*—New fences and walls should appear similar to those used historically within the district in terms of their scale, transparency, and character. Design of fence should respond to the design and materials of the house or main structure.
- ii. *Location*—Avoid installing a fence or wall in a location where one did not historically exist, particularly within the front yard. The appropriateness of a front yard fence or wall is dependent on conditions within a specific historic district. New front yard fences or wall should not be introduced within historic districts that have not historically had them.
- iii. *Height*—Limit the height of new fences and walls within the front yard to a maximum of four feet. The appropriateness of a front yard fence is dependent on conditions within a specific historic district. New front yard fences should not be introduced within historic districts that have not historically had them. If a taller fence or wall existed historically, additional height may be considered. The height of a new retaining wall should not exceed the height of the slope it retains.
- iv. *Prohibited materials*—Do not use exposed concrete masonry units (CMU), Keystone or similar interlocking retaining wall systems, concrete block, vinyl fencing, or chain link fencing.
- v. *Appropriate materials*—Construct new fences or walls of materials similar to fence materials historically used in the district. Select materials that are similar in scale, texture, color, and form as those historically used in the district, and that are compatible with the main structure. Screening incompatible uses—Review alternative fence heights and materials for appropriateness where residential properties are adjacent to commercial or other potentially incompatible uses.

C. PRIVACY FENCES AND WALLS

- i. *Relationship to front facade*—Set privacy fences back from the front façade of the building, rather than aligning them with the front façade of the structure to reduce their visual prominence.
- ii. *Location* – Do not use privacy fences in front yards.

FINDINGS:

- a. The main structure is a two-story Neoclassical home w, built circa 1909. It is a contributing structure in the Monte Vista Historic District, and was designated in 1975.
- b. There is an existing 6’ wrought iron rear fence. There are also 3 strands of barbed wire above the portion of the fence that spans the rear property line, that did not receive a Certificate of Appropriateness. The proposed

modification to the existing fence includes removing the barbed wire and adding 20" spikes above the existing 6' fence. The spikes are designed 6" apart. According to the Guidelines for Site Elements 2.B., new fences should appear similar to those used historically within the district in terms of scale, character, and height. Staff finds the design of the proposed spikes is not characteristic of the spires installed currently. Staff also finds that a fence that is 7'-8" is not historically found in the district

RECOMMENDATION:

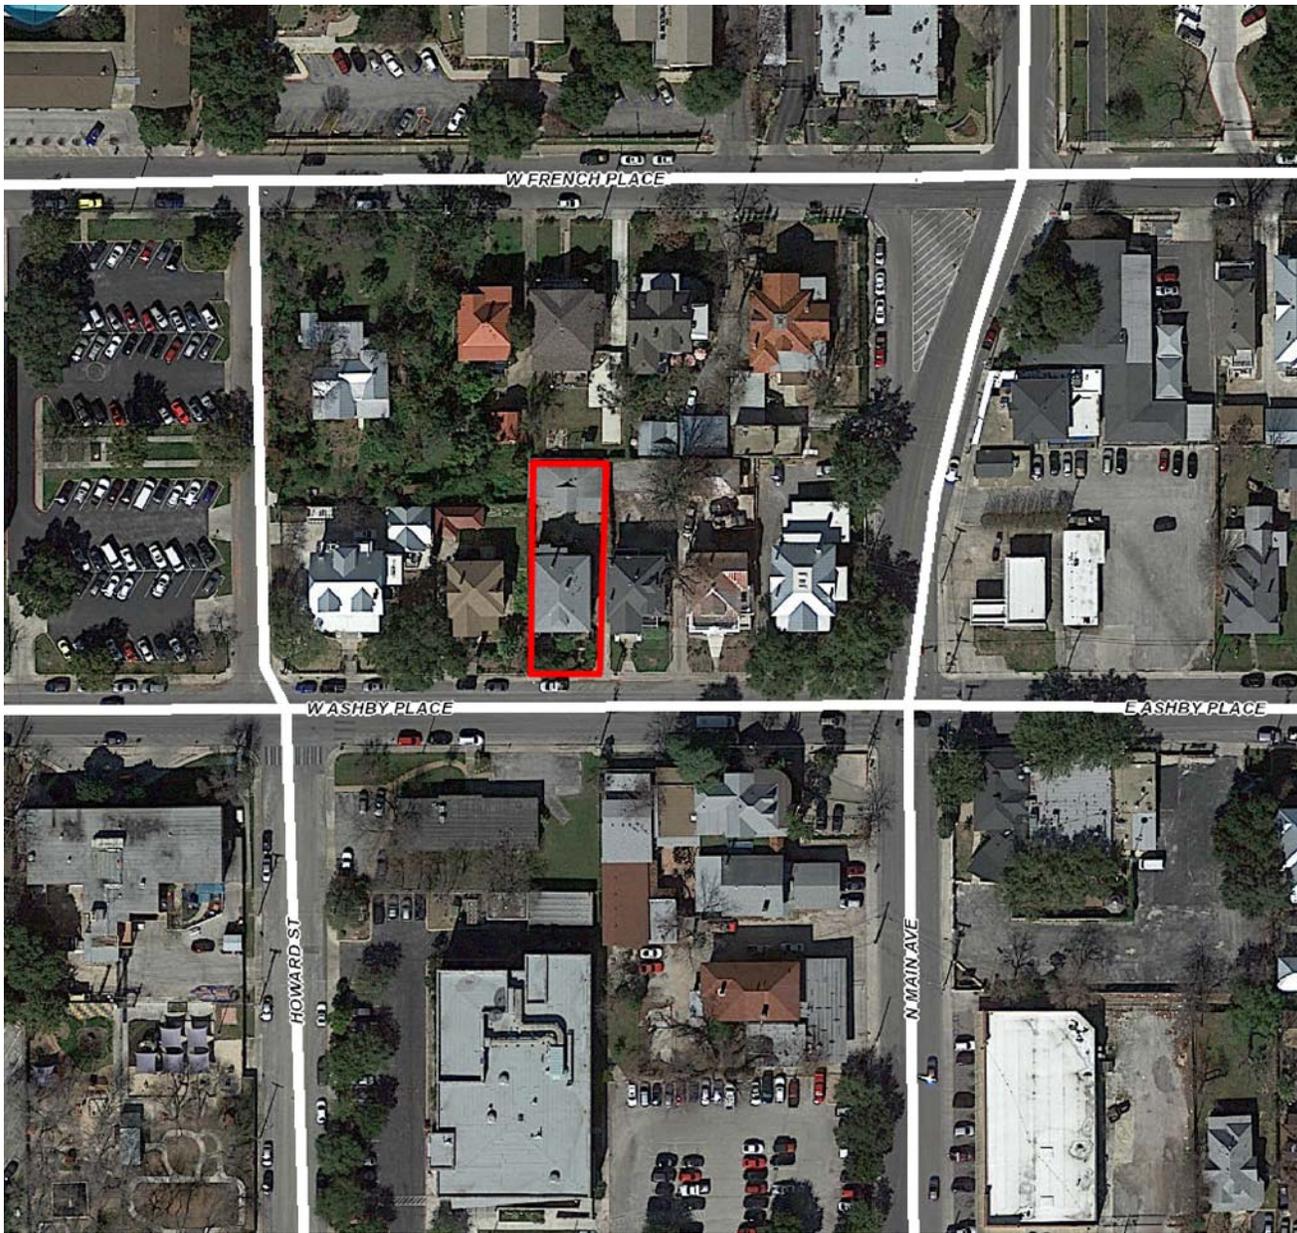

Staff does not recommend approval based on findings a and b.

CASE MANAGER:

Lauren Sage

CASE COMMENTS:

- March 3, 2013 – Development Services Department (DSD) received a complaint of razor wire on the property. DSD allowed the razor due to the fact that it has been in place for over 20 years. If the property owner in the future wants to remodel or alter the existing fence, a new permit would be required.
- March 4, 2014 – DSD received another complaint of the razor wire. Further research indicated that razor wire is not allowed by code, but barbed wire is allowed by Sec. 6-2. DSD directed the property owner to convert the existing razor wire to barbed wire.
- August 18, 2014 – A citation was issued because the property owner refused to remove the razor wire and install barbed wire. A court date was set for October 28, 2014, at which the property owner did not show, and was liable, by default.
- November 11, 2014 – A variance application was submitted for the razor wire, and was denied.
- November 20, 2014 – Another citation was issued because the property owner refused to remove the razor wire and install barbed wire.
- January 7, 2015 – The citation was dismissed because the property owner agreed to remove the razor wire and install barbed wire. She had 60 days to do so.
- January 23, 2015 – A letter from DSD to the applicant references the agreement made of January 7, 2015. The letter also states that code allows barbed wire, not razor wire.
- March 25, 2015 – A citation was issued because though some razor wire was replaced with barbed wire, some razor wire remained.
- May 1, 2015 – All razor wire was removed and replaced with 3 strands of barbed wire.
- June 3, 2015 – A request was heard by the HDRC to install three strands of barbed wire at 6" apart on top of an existing wrought iron fence along the back property line. Staff did not recommend approval. The commission moved to deny the request.
- The barbed wire was not removed and the 3 strands of barbed wire persist today.
- The final construction height of an approved fence may not exceed the maximum height as approved by the HDRC at any portion of the fence. Additionally, all fences must be permitted and meet the development standards outlined in UDC Section 35-514. The applicant will need to seek a variance from the Board of Adjustment for the additional fence height.
- Any property designated historic requires a Certificate of Appropriateness from the Office of Historic Preservation prior to performing any exterior modifications.

An aerial photograph of a residential neighborhood. The houses have various roof colors including red, brown, and grey. There are many trees, some with green foliage and others that are bare. A street is visible at the bottom of the frame with a few cars parked. The text "Dr. Yrizarry's Bed and Breakfast" is overlaid on the image, with a small circular icon containing the number "15" next to it.

Dr. Yrizarry's Bed
and Breakfast

An aerial photograph of a residential street. The central focus is a large, two-story house with a grey shingled roof and a prominent front porch supported by white columns. A white line points from the text label to the porch area. To the left and right are other houses with similar grey roofs. The foreground shows a paved road with a red curb and a dark-colored car parked. The background features more houses and some trees.

P.O. Box 839966
San Antonio, Texas 78204

Gentlemen:

In submitting the application to the Historic Design and Review Commission/City of San Antonio Office of Historic Preservation, for Lot 6, NCB 1885 (115 W. Ashby Place) for Dr. Ada Yrizarry, Dr. Yrizarry is not relinquishing the right to have 3-strand barb wire as granted by document dated January 23, 2015. This document was accepted by Dr. Yrizarry and the work was performed and completed according to the terms set out.

This letter is to protect my client's right that the document of January 23, 2015 created and established a contract and that the performance by my client according to the terms of your document have been fulfilled by Dr. Yrizarry.

If the plan submitted with the application to place stakes instead of barb wire is approved, the Applicant will abide by the terms of the new agreement.

Very truly yours,

Tom Stolhandske

AN ORDINANCE

AMENDING CHAPTER 35 OF THE CITY CODE THAT CONSTITUTES THE COMPREHENSIVE ZONING ORDINANCE OF THE CITY OF SAN ANTONIO BY CHANGING THE CLASSIFICATION OF AND REZONING CERTAIN PROPERTY DESCRIBED HEREIN.

* * *

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF SAN ANTONIO:

SECTION 1. Section 35-3007 of the Unified Development Code which is Chapter 35 of the City Code and constitutes the comprehensive zoning ordinance of the City of San Antonio is hereby amended so that it shall hereafter include the following described changes of classification and the rezoning of the hereinafter designated property, to-wit:

CASE NO. Z95165 CC

The rezoning and reclassification of property from Historic "B" Residence District to Historic "R-2" CC Two Family Residence District with special City Council approval for a bed and breakfast listed below as follows:

Lot 6, NCB 1885
115 W. Ashby

SECTION 2. All other provisions of Chapter 35, as amended, shall remain in full force and effect, including the penalties for violations as made and provided in Section 35-1024.

SECTION 3. The Director of Planning shall change the zoning records and maps in accordance herewith and the same shall be available and open to the public for inspection.

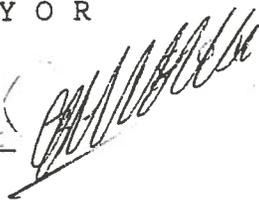

SECTION 4: This ordinance is not severable.
