### **Attachment I: Summary of SAWS Water and Wastewater Utility Service Regulations 2012**

Attached is a summary of the SAWS Utility Service Regulations (SAWS USR) for the extension of water and/or wastewater facilities as incorporated by reference in the latest version of the Unified Development Code, and in conformance with the requirement in the Texas Local Government Code that the Plan has a summary of the service extension policy (SAWS USR).

Water and wastewater service is only provided to lots that have been properly subdivided and platted or are a legal lot. For property that is required by subdivision regulations to construct water or wastewater facilities connecting to the SAWS system, funding and construction of those facilities will remain the responsibility of the developer.

If the specific undeveloped property does not have SAWS water or wastewater service fronting the property, the owner may make an application for an extension of service to SAWS Director of Infrastructure Development Department for review. If the Director determines that adequate capacity is available, or will be and if the project does not include SAWS cost participation or reimbursement, and if the proposed facilities are a logical extension of SAWS water and/or wastewater system and the requested extension meets the requirements of SAWS Utility Service Regulations, the extension size, capacity, and routing may be approved by the Director. Funding and construction of the facilities will be the responsibility of the developer. Depending on the size of the new facilities and other conditions, with SAWS Board of Trustees approval, SAWS may reimburse the developer for a portion of the cost of constructing certain facilities. With Board approval, SAWS may reimburse costs associated with the oversized capacity of water and wastewater mains. The actual calculation of the cost participation and reimbursement amounts, including limits and the schedules for the payments, are included in SAWS Utility Service Regulations as incorporated by reference in the UDC. For lots that have water or wastewater lines in the street fronting the lot, the owner may receive water or wastewater service by applying for a tap permit and paying any required fees. The new customers will be required to pay the impact fees and all connection fees.

If a property is served by a septic system, the property owner(s) remains responsible for the operation and maintenance of their septic system. If the septic system fails, the property owner must repair the system or pay to extend SAWS wastewater facilities to the property, if unavailable. Under certain circumstances the City of San Antonio Metropolitan Health Department and/or applicable regulatory agency for septic tanks may require the property owner to connect to SAWS public wastewater facilities. This policy is set by the City Council and can be amended in the future by ordinance.
