

**Existing Orange Lot (Ground Transportation Lot) & Northern Blvd. Intersection**

# Work for New Entrance to GT Lot

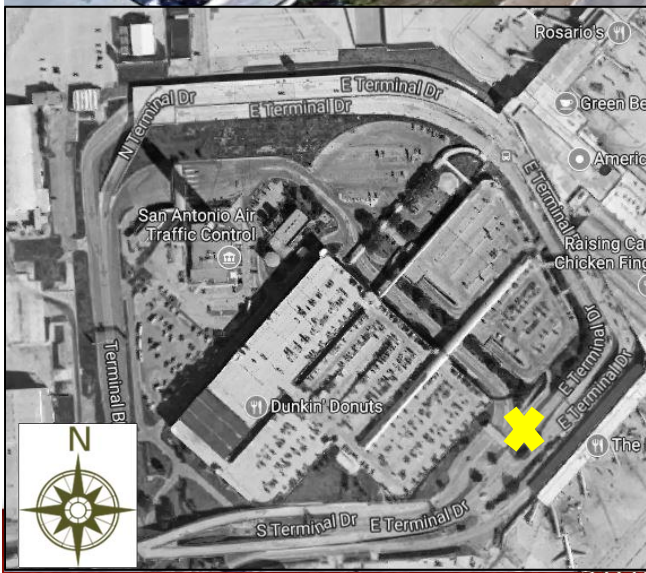

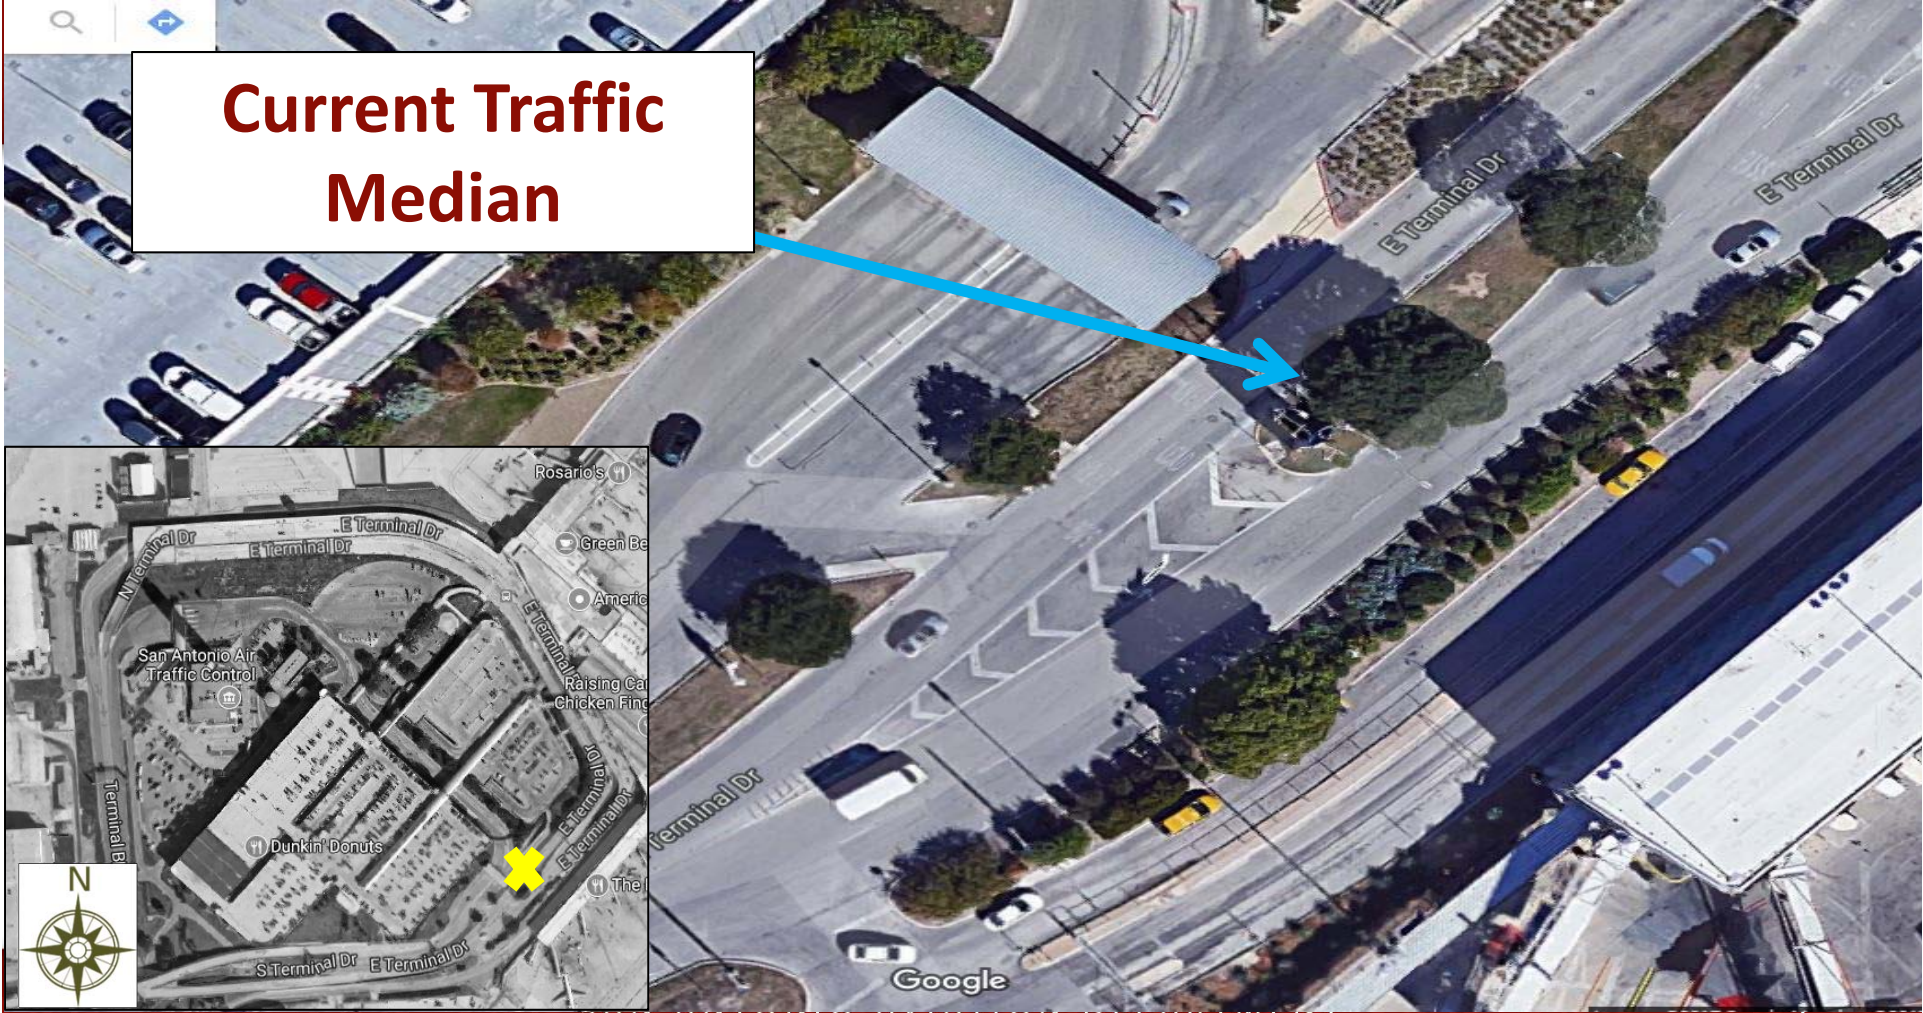

Tejas will be responsible for:

- **Modify current exit of lot to become the primary entrance and exit for the lot**
  - addition of a new entrance lane and the associated IT work, widening of the adjacent driveway and installation of the automatic vehicle identification (AVI) readers.
  - Striping and signage will also be part of the project.

Alpha will be responsible for constructing a cut-out between Airport Blvd and the service road to allow Ground Transportation vehicles to access the new entrance and exit to the lot. The firm will also remove vegetation, add asphalt and stripes for the turning lanes and signage.

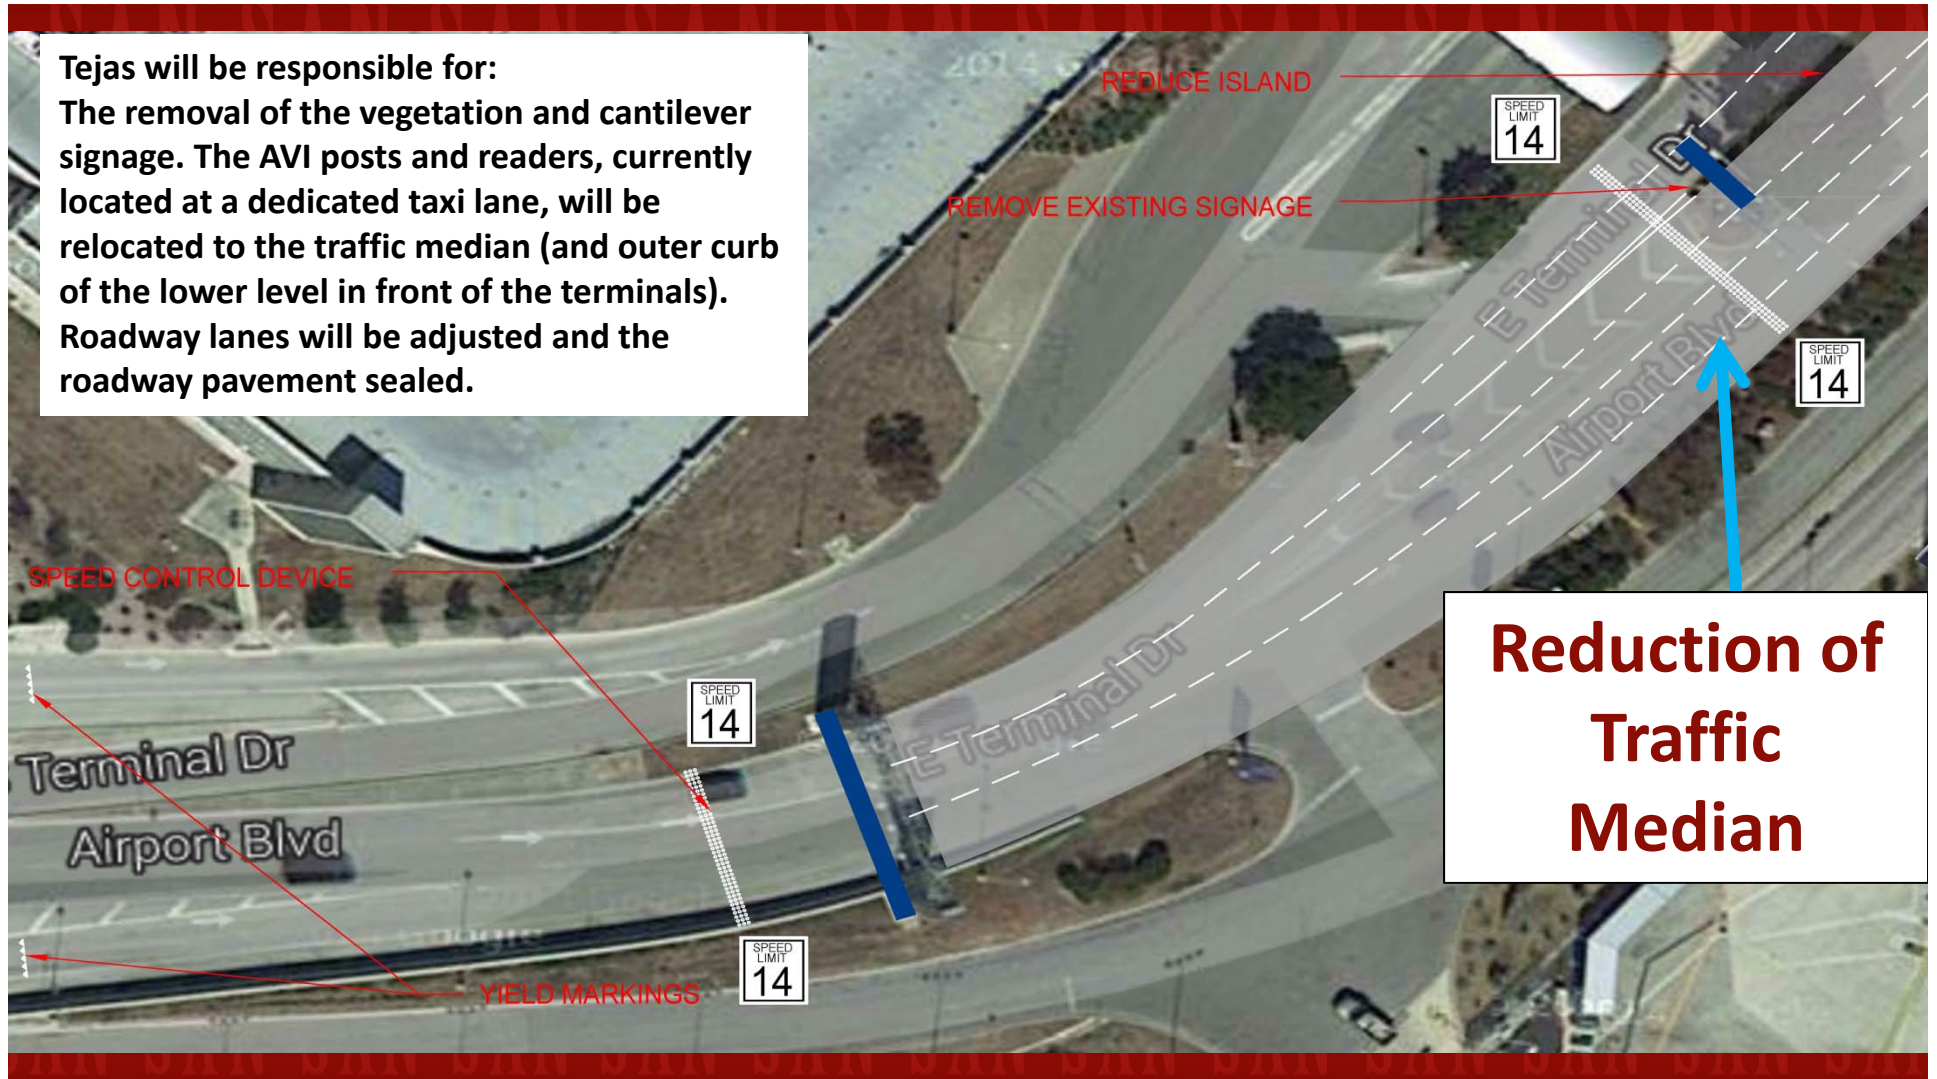

# Current Traffic Median

**Tejas will be responsible for:**  
The removal of the vegetation and cantilever signage. The AVI posts and readers, currently located at a dedicated taxi lane, will be relocated to the traffic median (and outer curb of the lower level in front of the terminals). Roadway lanes will be adjusted and the roadway pavement sealed.

**Reduction of  
Traffic  
Median**
