

## HISTORIC AND DESIGN REVIEW COMMISSION

April 06, 2016

Agenda Item No: 7

**HDRC CASE NO:** 2016-118  
**ADDRESS:** 458 FURR DR  
**LEGAL DESCRIPTION:** NCB 6696 BLK 5 LOT 22 W 25 FT OF 23 E 25 FT OF 21  
**ZONING:** R6 H  
**CITY COUNCIL DIST.:** 7  
**DISTRICT:** Monticello Park Historic District  
**APPLICANT:** Jeannette Trujillo/Floodmaster, Inc  
**OWNER:** David & Lydia Lerma  
**TYPE OF WORK:** Window replacement, front door, restore porch  
**REQUEST:**

The applicant is requesting a Certificate of Appropriateness for approval to:

1. Replace front door.
2. Enclose front porch ceiling.
3. Replace all 27 wood windows with 16 wood windows and 11 vinyl windows.

### APPLICABLE CITATIONS:

*Historic Design Guidelines, Chapter 2, Guidelines for Exterior Maintenance and Alterations*

#### 6. Architectural Features: Doors, Windows, and Screens

##### A. MAINTENANCE (PRESERVATION)

- i. *Openings*—Preserve existing window and door openings. Avoid enlarging or diminishing to fit stock sizes or air conditioning units. Avoid filling in historic door or window openings. Avoid creating new primary entrances or window openings on the primary façade or where visible from the public right-of-way.
- ii. *Doors*—Preserve historic doors including hardware, fanlights, sidelights, pilasters, and entablatures.
- iii. *Windows*—Preserve historic windows. When glass is broken, the color and clarity of replacement glass should match the original historic glass.
- iv. *Screens and shutters*—Preserve historic window screens and shutters.
- v. *Storm windows*—Install full-view storm windows on the interior of windows for improved energy efficiency. Storm window may be installed on the exterior so long as the visual impact is minimal and original architectural details are not obscured.

##### B. ALTERATIONS (REHABILITATION, RESTORATION, AND RECONSTRUCTION)

- i. *Doors*—Replace doors, hardware, fanlight, sidelights, pilasters, and entablatures in-kind when possible and when deteriorated beyond repair. When in-kind replacement is not feasible, ensure features match the size, material, and profile of the historic element.
- ii. *New entrances*—Ensure that new entrances, when necessary to comply with other regulations, are compatible in size, scale, shape, proportion, material, and massing with historic entrances.
- iii. *Glazed area*—Avoid installing interior floors or suspended ceilings that block the glazed area of historic windows.
- iv. *Window design*—Install new windows to match the historic or existing windows in terms of size, type, configuration, material, form, appearance, and detail when original windows are deteriorated beyond repair.
- v. *Muntins*—Use the exterior muntin pattern, profile, and size appropriate for the historic building when replacement windows are necessary. Do not use internal muntins sandwiched between layers of glass.
- vi. *Replacement glass*—Use clear glass when replacement glass is necessary. Do not use tinted glass, reflective glass, opaque glass, and other non-traditional glass types unless it was used historically. When established by the architectural style of the building, patterned, leaded, or colored glass can be used.
- vii. *Non-historic windows*—Replace non-historic incompatible windows with windows that are typical of the architectural style of the building.
- viii. *Security bars*—Install security bars only on the interior of windows and doors.

- ix. Screens—Utilize wood screen window frames matching in profile, size, and design of those historically found when the existing screens are deteriorated beyond repair. Ensure that the tint of replacement screens closely matches the original screens or those used historically.
- x. Shutters—Incorporate shutters only where they existed historically and where appropriate to the architectural style of the house. Shutters should match the height and width of the opening and be mounted to be operational or appear to be operational. Do not mount shutters directly onto any historic wall material.

#### 7. Architectural Features: Porches, Balconies, and Porte-Cocheres

#### B. ALTERATIONS (REHABILITATION, RESTORATION, AND RECONSTRUCTION)

- i. *Front porches*—Refrain from enclosing front porches. Approved screen panels should be simple in design as to not change the character of the structure or the historic fabric.
- ii. *Side and rear porches*—Refrain from enclosing side and rear porches, particularly when connected to the main porch or balcony. Original architectural details should not be obscured by any screening or enclosure materials. Alterations to side and rear porches should result in a space that functions, and is visually interpreted as, a porch.
- iii. *Replacement*—Replace in-kind porches, balconies, porte-cocheres, and related elements, such as ceilings, floors, and columns, when such features are deteriorated beyond repair. When in-kind replacement is not feasible, the design should be compatible in scale, massing, and detail while materials should match in color, texture, dimensions, and finish.
- iv. *Adding elements*—Design replacement elements, such as stairs, to be simple so as to not distract from the historic character of the building. Do not add new elements and details that create a false historic appearance.
- v. *Reconstruction*—Reconstruct porches, balconies, and porte-cocheres based on accurate evidence of the original, such as photographs. If no such evidence exists, the design should be based on the architectural style of the building and historic patterns.

#### FINDINGS:

- a. The main structure at 458 Furr Drive is a two-story Spanish eclectic with a clay tile roof, stone façade, front gable and hipped roof.
- b. The existing front door is solid wood with one window lite and decorative bars. The applicant is requesting to replace the existing front door with an in-kind wooden front door. The applicant suggests the current front door has been severely damaged by fire and smoke and requires replacement. According to the Guidelines for Exterior Maintenance and Alterations 6.A.ii., historic doors including hardware and fanlights should be preserved, or replaced in-kind when deteriorated beyond repair. Staff finds replacement of the door appropriate and consistent with the guidelines. Staff finds that there has been substantial damage to the existing door, and finds the replacement to be appropriate.
- c. The existing front porch ceiling has been damaged by fire and smoke. The applicant is proposing to replace the front porch ceiling with wood or fiber cement sheets. According to the Guidelines for Exterior Maintenance and Alterations 7.B.iii., porch elements such as ceilings should be replaced in-kind. Staff finds the proposal consistent with the guidelines. Staff finds that there has been substantial damage to the porch, and finds the replacement to be appropriate.
- d. The applicant is requesting to replace all 27 wood windows with 16 wood windows and 11 vinyl windows. The 11 vinyl window replacements are proposed on the rear elevation with the exception of window #5 on the left elevation. According to the Guidelines for Maintenance and Alterations 6.A.iii., historic windows should be preserved unless 50% or more of a window's components must be reconstructed; when windows must be replaced, the Guidelines for Maintenance and Alterations B.iv., states that new windows should be installed to match the historic windows in terms of configuration, material, and appearance. Staff recommends the historic wood windows be repaired, and replaced as necessary with wood windows of the same profile, and should the applicant follow this recommendation, that they return with a window schedule and details of the proposed windows to be installed.

#### RECOMMENDATION:

Staff recommends approval for items #1 and #2. Staff does not recommend approval of item #3. Staff recommends the historic wood windows be repaired, and replaced as necessary with wood windows of the same profile, and should the

applicant follow this recommendation, that they return with a window schedule and details of the proposed windows to be installed.

**CASE MANAGER:**

Lauren Sage

**458 Furr**
