A low-wing aircraft is shown in flight against a clear blue sky. Below the aircraft, a thick layer of white and grey clouds is visible, with the sun setting behind them, creating a bright glow and lens flare effects. The overall scene is serene and evocative.

## Mark Huffstutler

## **Mark Huffstutler**

Huffstutler says his interest in flying started when his father began taking him out to the airport at a young age. By the age of 16, he had received his private pilot's license while still in High School.

He later went on to attend Texas A&M University, where he decided to study architecture but his urge to fly couldn't be squelched. During the summer recess at A&M he would work on his advanced rating gaining his Commercial, Multi-engine and Instrument rating in 1979.

In 1979 and 1980 he served as co-pilot of former Texas Gov. Dolph Briscoe Jr. flying the Howard 500 executive transport. In 1981, Huffstutler was hired by United Airlines and trained as a flight crewmember which ended when the airline went on strike and Huffstutler elected to return to concentrate on his entrepreneurial desires.

Huffstutler and his father purchased the fixed-based operation (FBO) business in Uvalde in 1980. This business, Uvalde Flight Center, was an established provider of fuel and transient aircraft services at the Uvalde Garner Field Municipal Airport which would be the genesis of the growing aviation business portfolio in the future.

His strategy for growing the business over the next 30 years would be to buy companies with aircraft modification rights and similar services and absorb these technologies into his own businesses. Through this approach, Huffstutler assembled a portfolio of 8 distinct business entities organized the umbrella of The SkyWay Group – a vertically integrated group of products and services invested with the corporate business aviation segment.

### **ARTICLE BELOW FROM NSIDE MAGAZINE- SAN ANTONIO:**

*People recognize him throughout the world. He steps onto an aircraft with ease and respect. He understands its every component, the power it releases as the engine stirs waiting for liftoff. The sky represents the road to freedom; he can travel as far as he deems, on his own schedule and at his own pace. He's renowned by those individuals in his industry as a man with vision and steadfast dedication to his craft. "Passion in profession," he says boldly. "This is the only job I've ever done. A lot of my success is because I'm persistent and passionate about what I do."*

*In addition to his passion for work, Mark is also an avid collector of historic military aircraft and he collects, restores and flies planes from WWII. He and his son even built an aircraft in their garage. "Success seems to surface at greater speed when you love what you do," he shares.*

Huffstutler continued to add additional ratings and capabilities ultimately achieving an Airline Transport Pilot Rating (ATP), Certified Flight Instructor (CFI) and Flight Engineer (FE) license along with more than 15,000 hours of flight time including more than 40 crossings of the North Atlantic and Pacific. Through the years he has added multiple type ratings for business jet aircraft as well as the Airframe and Powerplant (A&P) license with Inspector Authorization (IA) allowing him to return to service aircraft and engines after major repair and alteration.
