

City Council Consideration A Session

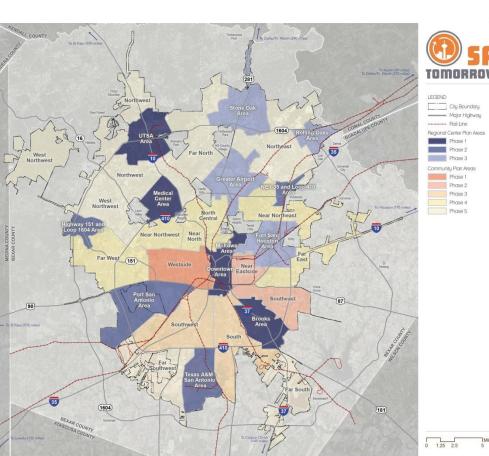

### Proposed Land Use Categories Thursday, October 11, 2018

Rudy Nino, AICP, Assistant Director Planning Department MIG

Cambridge Systematics, Inc Bowtie Economic & Planning Systems, Inc Auxiliary Marketing Services Ianning and Development Services

# SA Tomorrow Comprehensive Plan Implementation

MG

- City's adopted policy and land use document
  - Updated comprehensive planning program
    - Area specific sub-area master plans
      - **13 Regional Centers** large employment and economic activity hubs throughout the City
      - 17 Community Areas encompasses all of the City not located within a Regional Center; identified based on community and neighborhood association input
  - 3-phase work plan for the 13 Regional Centers
- 5-phase work plan for the 17 Community Plans

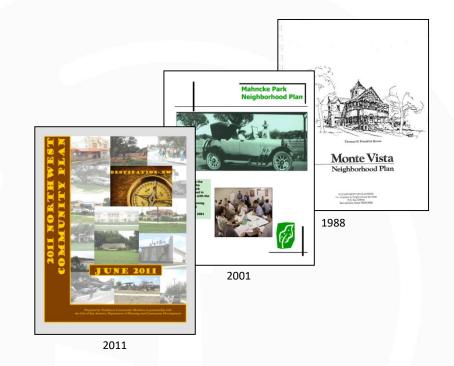

# What is a Future Land Use Plan?

- A Regulatory guide
- Presents <u>orderly desired future development</u>
  <u>patterns</u>
- Decision-making tool for zoning and development used by:
  - City Staff
  - Planning Commission
  - Zoning Commission
  - City Council
- Provides clearly defined land use categories
- Facilitates complementary transitions to reduce conflicts with adjacent uses
- Determines which zoning districts are appropriate for future development in an area
- Adoption of these proposed land use categories will not change the zoning of your property

Land Use (Categories)	Zoning (Districts)
A land use plan is a set of broad <b>policies and principles</b> to guide the City's decision-making regarding growth and development patterns.	Zoning consists of specific <i>regulations</i> about how property owners may use and develop their land, consistent with the Future Land Use Plan.
It is a policy document that guides the physical development of a community.	The zoning ordinance is a law with penalties and consequences for not following it.
The focus of the land use plan is to articulate the City's vision for future growth patterns and community form.	The focus of the zoning code is compatibility of neighboring uses and transitions.

### **Reasons to Revise Land Use Categories**

- Currently, there are over 40 adopted land use plans, some 30 years old, that collectively establish 52 varying land use categories, and do not establish a unified regulatory land use schema for the overall city.
- Create, eliminate, or revise categories to allow successful implementation of San Antonio's Comprehensive Plan and the 30 Sub-Area plans.
- Create a consistent, predictable group of land use categories to be used in all areas of the City over the next five years and beyond.
- Address known challenges of existing classification(s).

### Process

- Started with adopted UDC Land Use categories
- Series of Focus Group meetings (November 2017)
  - Community groups (including not-for-profit organizations);
  - Neighborhood coalitions;
  - External governmental stakeholders;
  - Development industry representatives; and,
  - Affected City departments
- Citywide community meetings
  - January 30, 2018 Henry B. Gonzalez Convention Center
  - July 26, 2018 Roosevelt Park Clubhouse
  - July 28, 2018 Southwest Service Center Assembly
  - July 31, 2018 Stinson Airport
  - August 2, 2018 Igo Library
- San Antonio for Growth on the Eastside August 23, 2018
- AIA community meetings
- Met with the City Council Offices
- Future land use specific webpage launched

### Process

- Planning Commission Briefing January 24, 2018
- Planning Commission Technical Advisory Committee (PCTAC) Briefing – March 2, 2018
- PCTAC Consideration May 11, 2018 (Recommendation for Approval)
- Zoning Commission Briefing May 15, 2018
- Planning Commission Consideration May 23, 2018 (Recommendation for Approval)
- Zoning Commission Consideration June 5, 2018 (Recommendation for Approval)
- Comprehensive Planning Committee Briefing August 15, 2018
- City Council Consideration

## Example of Inconsistency: Land Use Categories & Related Zoning Districts

Nogalitos / S. Zarzamora Community Plan (2004)		Lone Star Community Plan (2013)	
Low Density Residential:	R-4, R-5, R-6, R-20	Low Density Residential:	R-3, R-4, R-5, R-6
Medium Density Residential:	R-4, R-5, R-6, RM-4, RM-5, RM-6	Medium Density Residential:	R-3, R-4, R-5, R-6, RM-4, RM-5, RM-6, MF-18
High Density Residential	RM-4, RM-5, RM-6, MF-25, MF-33, MF-40		
		Low Density Mixed Use:	RM-4, MF-18, MF-25, MF-33, O-1, NC, C-1, C- 2P, IDZ, TOD, MXD, FBZD, AE-2, AE-4

### **Proposed Land Uses**

PROPOSED Comprehensive Land Permitted zoning districts or description of land use category

\* IDZ and PUD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

\*\* IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

\*\*\* IDZ, TOD, and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above

Use Category	
Residential Estate	FR, R-20, RE, and RP
Low Density Residential	R-4, R-5, R-6, NP-8, NP-10, and NP-15 *
Urban Low Density Residential	R-3, R-4, R-5, R-6, RM-5, RM-6, MF-18, MH, MHC, MHP, and NC **
Medium Density Residential	R-3, R-4, RM-4, RM-5, RM-6, MF-18, MF-25, MF-33, MH, MHC, and MHP **
High Density Residential	RM-4, MF-25, MF-33, MF-40, MF-50, MF-65, MH, MHC, and MHP **
Neighborhood Commercial	O-1, NC, and C-1 **
Community Commercial	O-1.5, NC, C-1, and C-2 **
Regional Commercial	O-1.5, O-2, C-2, C-3, L, and BP **
Neighborhood Mixed-Use	RM-4, RM-5, RM-6, MF-18, O-1, NC, C-1, MH, MHC, MHP, FBZD, AE-1, and AE-2 **
<u>Urban Mixed-Use</u>	RM-4, RM-5, RM-6, MF-18, MF-25, MF-33, MF-40, O-1, O-1.5, C-1, C-2, MH, MHP, MHC, FBZD, AE-1, AE-2, AE-3, and AE-4 **
Regional Mixed-Use	MF-33, MF-40, MF-50, MF-65, O-1.5, O-2, C-2, C-3, D, ED, FBZD, AE-1, AE-2, AE-3, and AE-4 **
Employment/Flex Mixed-Use	RM-4, MF-18, MF-25, MF-33, O-1, O-1.5, C-1, C-2, L, AE-1, AE-2, AE-3, and AE-4 **
Business/Innovation Mixed-Use	RM-4, MF-18, MF-25, O-1.5, O-2, C-2, C-3, L, I-1, MI-1, BP, AE-1, AE-2, AE-3, and AE-4 **
Light Industrial	L, I-1, MI-1, and BP ***
<u>Heavy Industrial</u>	I-1, I-2, MI-1, MI-2, QD, and SGD
<u>Agricultural</u>	RP and FR
	May include, but is not limited to, large, linear, or unimproved land where conservation is promoted and development is not encouraged due to the presence of topographic constraints or institutional uses on the site. Parks/Open Space may include utility corridors and public or private land uses that encourage outdoor passive or active recreation. Examples include city owned and/or operated pocket, regional, or linear parks, as well as private parks associated with subdivisions and neighborhood associations.
	Includes areas owned and operated by a federal, state, or city agency. Examples may include government offices, public service facilities such as libraries and police stations, military bases, state colleges, and federal courts. This category does not apply to properties owned by a public agency but leased to and operated by another party.

## Existing vs Proposed Land Uses

Existing UDC Land Use Categories	PROPOSED Comprehensive Land Use Categories
Low density residential estate	Residential Estate
Low density residential	Low Density Residential
	Urban Low Density Residential
Medium density residential	Medium Density Residential
High density residential	High Density Residential
Very high density residential	
<u>Office</u>	
Neighborhood commercial	Neighborhood Commercial
Community commercial	Community Commercial
Regional commercial	Regional Commercial
Mixed use	Neighborhood Mixed-Use
	Urban Mixed-Use
	Regional Mixed-Use
	Employment/Flex Mixed-Use
Business/office park	Business/Innovation Mixed-Use
Light industrial	Light Industrial
<u>Heavy industrial</u>	Heavy Industrial

### **SF (F) TOMORROW** Draft General Land Use Categories: Detailed

M I G

Residential Estate	Low Density Residential	Urban Low Density Residential	Medium Density Residential	High Density Residential
Includes large lot single-family detached houses on individual estate-sized lots or in conservation subdivisions. This form of development should be located away from major arterials, and can include certain nonresidential uses such as schools, places of worship, and parks that are centrally located for convenient neighborhood access. Typical densities in this land use category would be up to 2 dwelling units per acre.	Includes single-family detached houses on individual lots, including manufactured and modular homes. This form of development should not typically be located adjacent to major arterials. This land use category can include certain nonresidential uses such as schools, places of worship, and parks that are centrally located for convenient neighborhood access. Typical densities in this land use category would range from 3 to 12 dwelling units per acre.	Accommodates a range of housing types including single-family attached and detached houses on individual lots, small lot residences, duplexes, triplexes, fourplexes, cottage homes, manufactured homes, low-rise garden-style apartments, and manufactured home parks. This land use category may also accommodate small scale retail and service uses that are intended to support the adjacent residential uses. Other nonresidential uses, including, but not limited to, schools, places of worship, and parks are appropriate within these areas and should be centrally located to provide easy accessibility. Typical densities in this land use category would range from 7 to 18 dwelling units per acre.	Accommodates a range of housing types including single-family attached and detached houses on individual lots, manufactured and modular homes, duplexes, triplexes, fourplexes, and low-rise, garden- style apartments with more than four (4) dwelling units per building. Cottage homes and very small lot single-family houses are also appropriate within this land use category. Higher density multi-family uses, where practical, should be located in proximity to transit facilities. Certain nonresidential uses, including, but not limited to, schools, places of worship, and parks are appropriate within these areas and should be centrally located to provide easy accessibility. Typical densities in this land use category	Includes low-rise to mid-rise buildings with four (4) or more dwelling units in each. High density residential provides for compact development including apartments, condominiums, and assisted living facilities. This form of development is typically located along or near major arterials or collectors. High density multi-family uses should be located in close proximity to transit facilities. Certain nonresidential uses including, but not limited to schools, places of worship, and parks are appropriate within these areas and should be centrally located to provide easy accessibility. This classification may be used as a transitional buffer between lower density residential uses. High density

classification may be used as a transitional buffer between lower density residential uses and nonresidential uses. High density residential uses should be located in a manner that does not route traffic through lower-density residential uses. Typical densities in this land use category would range from 25 to 65 dwelling units per acre

would range from 13 to 33 dwelling

units per acre.

#### **Neighborhood Commercial**

Includes smaller intensity commercial uses such as smallscale retail or offices, professional services, and convenience retail and services that are intended to support the adjacent residential uses. Neighborhood commercial uses should be located within walking distance of neighborhood residential areas. Special consideration should be given to pedestrian and bicycle facilities that connect neighborhoods to commercial nodes.

#### **Community Commercial**

Includes offices, professional services, and retail uses that are accessible to bicyclists and pedestrians and linked to transit facilities. This form of development should be located in proximity to major intersections or where an existing commercial area has been established. Community commercial uses are intended to support multiple neighborhoods, have a larger market draw than neighborhood commercial uses, and attract patrons from the neighboring residential areas. All off-street parking and loading areas adjacent to residential uses should include landscape buffers, lighting and signage controls. Examples of community commercial uses include, but are not limited to, cafes, offices, restaurants, beauty parlors, neighborhood groceries or markets, shoe repair shops and medical clinics.

#### **Regional Commercial**

Includes high intensity uses that draw customers from a both adjacent communities as well as the larger metropolitan region. Regional commercial uses are typically located in general proximity to nodes along expressways or major arterial roadways and incorporate high-capacity transit facilities. Regional Commercial uses should incorporate well-defined entrances, shared internal circulation, limited curb cuts to expressways and arterial streets, sidewalks and shade trees in parking lots, landscaping between the parking lots and roadways, and well-designed monument signage. Examples of regional commercial uses include, but are not limited to, movie theaters, plant nurseries, automotive repair shops, fitness centers, home improvement centers, hotels and motels, mid- to high-rise office buildings, and automobile dealerships.

#### **Neighborhood Mixed-Use**

Contains a mix of residential, commercial, and institutional uses at a neighborhood scale. Within mixeduse buildings, residential units located above first floor are encouraged. Typical first floor uses include, but are not limited to, small office spaces, professional services, and small scale retail establishments and restaurants. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Neighborhood Mixed-Use area to ensure access to housing options and services within close proximity for the local workforce. Where practical, buildings are situated close to the public right-of-way, and parking is located behind buildings. Parking requirements may be minimized using a variety of creative methods, such as shared or cooperative parking agreements, to maximize land available for housing and community services. Pedestrian spaces are encouraged to include lighting and signage, and streetscaping should be scaled for pedestrians, cyclists, and vehicles. Properties classified as Neighborhood Mixed-Use should be located in close proximity to transit facilities.

#### Urban Mixed-Use

Contains a mix of residential, commercial, and institutional uses at a medium level of intensity. Urban Mixed Use development is typically larger-scale than Neighborhood Mixed-Use and smallerscale than Regional Mixed-Use, although many of the allowable uses could be the same in all three categories. Building footprints may be block-scale, but could be smaller depending on block configuration and overall development density. Typical first floor uses include, but are not limited to, professional services, offices, institutional uses, restaurants, and retail including grocery stores. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Urban Mixed-Use areas to ensure access to housing options and services within close proximity for the local workforce. Structured parking is encouraged in Urban Mixed-Use category, but is not required. Parking requirements may be satisfied through shared or cooperative parking agreements, which could include off-site garages or lots. The Urban Mixed-Use category should be located in proximity to transit facilities.

#### **Regional Mixed-Use**

Contains residential, commercial and institutional uses at high densities. Regional Mixed-Use developments are typically located within regional centers and in close proximity to transit facilities, where mid-rise to high-rise buildings would be appropriate. Typical lower floor uses include, but are not limited to, offices, professional services, institutional uses, restaurants, and retail including grocery stores. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Regional Mixed-Use areas to ensure access to housing options and services within close proximity for the local workforce. Where feasible, development is ideally built at the block scale, with minimum building setbacks. Parking requirements may be satisfied through shared or cooperative parking agreements, which can include offsite garages or lots. If parking requirements are satisfied on-site, structured parking is encouraged. Pedestrian spaces are encouraged to be generous in width and lighting, with streetscaping and signage scaled to pedestrians. Regional Mixed Use projects encourage incorporation of transit facilities into development.

#### **Employment/Flex Mixed-Use**

Provides a flexible live/work environment with an urban mix of residential and light service industrial uses. Uses include smaller-scale office, retail, art studio warehouses, art-oriented fabrication, creative businesses and work spaces, and cottage industrial and fabrication uses. Adaptive uses of vacant or underutilized structures are encouraged to provide residential urban infill and appropriate employment opportunities within or in close proximity to neighborhoods. Buildings have a smaller footprint and can closely resemble campus-like development across multiple sites or with several multi-functioning buildings on one site.

#### **Business/Innovation Mixed-Use**

Accommodates industrial uses with office, commercial, and residential uses, all within a cohesive setting, on a larger scale and within larger footprints than the Employment/Flex Mixed-Use category. Industrial arts workshops, high tech fabrication, processing and assembly, and other industrial uses are permitted, in addition to commercial uses. Vocational training, technological learning centers, medical campuses, and research/development institutions are also appropriate for these spaces. Additional environmental performance standards should be employed for properties designated as Business/Innovation Mixed-Use, such as hours of activity, loading, noise levels and lighting, to ensure that the intensity of the industrially oriented uses is comparable to that of the other non-residential uses. The mix of uses may be either vertically or horizontally distributed. Live/work housing options are permissible in Business/Innovation Mixed Use areas to ensure access to housing options and services within close proximity of business innovation areas for the local-workforce. Business/Innovation mixed use should incorporate transit and bicycle facilities to serve the training and employment base.

### **Industrial Land Uses**

#### **Light Industrial**

Includes a mix of manufacturing uses, business park, and limited retail/service uses that serve the industrial uses. Industrial uses should be screened and buffered from adjoining non-industrial uses. Any outside storage should be under a roof and screened from public view. Examples of light industrial uses include drug laboratories, furniture wholesalers, lumberyards, food production, and warehousing.

#### **Heavy Industrial**

Includes heavy manufacturing, processing and fabricating businesses. Heavy industrial uses shall be concentrated at arterials, expressways, and railroad lines. This category is not compatible with neighborhood-scaled categories or those that permit residential zoning. Heavy Industrial should be separated from non-industrial uses by an allowable land use or a significant buffer. Examples of heavy industrial uses include auto manufacturing, battery manufacturing, and petro chemical bulk storage.

### **Non-residential Land Uses**

#### Agricultural

Includes crop agriculture, ranching, and related agribusiness practices. Single-family detached houses and detached accessory dwelling units are permitted on agricultural and ranch lands at very low densities or in conservation subdivisions that will not interfere with agricultural operations. Limited commercial uses directly serving agricultural and ranching uses, such as farmers markets, nurseries, stables, bed and breakfasts are permitted. To maintain scenic qualities, natural vegetative buffers, deeper setbacks, increased signage control, earthen drainage channels, and more restrictive access management standards are desired along major scenic corridors. Floodplain protection and buffer zones along creeks and rivers are instrumental in retaining rural character.

#### Parks/Open Space

May include, but is not limited to, large, linear, or unimproved land where conservation is promoted and development is not encouraged due to the presence of topographic constraints or institutional uses on the site. Parks/Open Space may include utility corridors and public or private land uses that encourage outdoor passive or active recreation. Examples include city owned and/or operated pocket, regional, or linear parks, as well as private parks associated with subdivisions and neighborhood associations.

#### **City/State/Federal Government**

Includes areas owned and operated by a federal, state, or city agency. Examples may include government offices, public service facilities such as libraries and police stations, military bases, state colleges, and federal courts. This category does not apply to properties owned by a public agency but leased to and operated by another party.

Low density residential estateResidential Estate – includes large lot singesingle-family detached houses on individual estate-sized lots or in conservation subdivisions. This form of development should be located away from major arterials, and can include certain nonresidential uses such as schools, places of worship, and parks that are centrally located for convenient neighborhood access. Permitted zoning districts: FR, R-20, RE, and RP and RD, as well as IDZ with uses and density permitted in R-20, RE, RP, and RD.

• <u>Typical densities in this land use category</u> would be up to 2 dwelling units per acre.

Low density Density residential Residential – includes single-family detached houses on individual lots, including manufactured and modular homes-at typical suburban densities. This form of development should not typically be located adjacent to be located away from major arterials, and. This land use category can include certain nonresidential uses such as schools, places of worship, and parks that are centrally located for convenient neighborhood access. Permitted zoning districts: R-4, R-5, R-6, NP-8, NP-10, and NP-15, and UD, as well as IDZ with uses and density permitted in R-5, R-6, NP-8, NP-10, NP-15, and UD.

- <u>Typical densities in this land use category would range</u> from 3 to 12 dwelling units per acre.
- IDZ and PUD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

**Urban Low Density Residential** – accommodates a range of housing types including single-family attached and detached houses on individual lots, small lot residences, duplexes, triplexes, fourplexes, cottage homes, manufactured homes, low-rise garden-style apartments, and manufactured home parks. This land use category may also accommodate small scale retail and service uses that are intended to support the adjacent residential uses. Other nonresidential uses, including, but not limited to, schools, places of worship, and parks are appropriate within these areas and should be centrally located to provide easy accessibility. Permitted zoning districts: R-3, R-4, R-5, R-6, RM-5, RM-6, MF-18, MH, MHC, MHP, and NC.

- <u>Typical densities in this land use category would range</u> from 7 to 18 dwelling units per acre.
- IDZ, PUD, MXD, and TOD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

Medium density Density residential Residential – accommodates a range of housing types including single-family attached and detached houses on individual lots, duplexes, triplexes, fourplexes, and low-rise, garden-style apartments with more than four (4) dwelling units per building. Cottage homes and very small lot single-family houses are also appropriate within this land use category. Detached and attached accessory dwelling units such as granny flats and garage apartments are allowed when located on the same lot as the principal residence. Higher density multi-family uses should be located in proximity to transit facilities. Certain nonresidential uses, such as including, but **not limited to,** schools, places of worship, and parks, are appropriate within these areas and should be centrally located to provide easy accessibility. Permitted zoning districts: R-3, R-4, RM-4, RM-5, RM-6, MF-18, MF-25, MF-33, MH, MHC, and MHP-and UD, as well as IDZ with uses and density permitted in R-3. R-4. RM-4. RM-5. RM-6. MF-18 and UD.

- <u>Typical densities in this land use category would range from 13</u> to 33 dwelling units per acre.
- IDZ, PUD, MXD, and TOD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

High density Density residential Residential – includes low-rise to midrise apartments buildings with more than four (4) dwelling units per buildingin each. High density residential provides for compact development including apartments, condominiums, and assisted living facilities. This form of development is typically located along or near major arterials or collectors. High density multi-family uses should be located in close proximity to transit facilities. Certain nonresidential uses, such as schools, places of worship, and parks, are appropriate within these areas and should be centrally located to provide easy accessibility. This classification may be used as a transitional buffer between lower density residential uses and nonresidential uses. High density residential uses should be located in a manner that does not route traffic through other, lower-density residential uses. Permitted zoning districts: RM-4, MF-25, MF-33, MF-40, MF-50, MF-65, MH, MHC, and MHP and UD, as well as IDZ with density permitted in MF-25, MF-33, and UD.

- <u>Typical densities in this land use category would range from 25</u> to 50 dwelling units per acre.
- IDZ, PUD, MXD, and TOD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

Neighborhood commercial\_Commercial – includes smaller intensity commercial uses such as small-scale retail or offices, professional services, and convenience retail and services, and shop front retail that are intended to support the adjacent residential uses. serves a market equivalent to a neighborhood. Neighborhood commercial uses should be located at the intersection of residential streets and arterials, and within walking distance of neighborhood residential areas, or along arterials where already established. Special consideration should be given to pedestrian and bicycle facilities that connect neighborhoods to commercial nodes. Permitted zoning districts: O-1, NC, and C-1, and O-1.

 IDZ, PUD, MXD, TOD, and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

**Community** commercial Commercial – includes offices, professional services, and retail uses that are accessible to bicyclists and pedestrians and linked to transit facilities. This form of development should be located at nodes on arterials at in proximity to major intersections or where an existing commercial area has been established. Community commercial uses are intended to support multiple neighborhoods, have a larger market draw than neighborhood commercial uses, and attract patrons from the neighboring residential areas. Parking areas should be located behind the building, with the exception of one row of parking facing the street. Additionally, aAll off-street parking and loading areas adjacent to residential uses should include landscape buffers, lighting and signage controls. Examples of community commercial uses include, but are not limited to, cafes, offices, restaurants, beauty parlors, neighborhood groceries or markets, shoe repair shops and medical clinics. Permitted zoning districts: O-1.5, NC, C-1, and C-2, C-2P and HD.

• IDZ, PUD, MXD, TOD, and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

Regional commercial Commercial – includes high density land intensity uses that draw customers from a larger both adjacent communities as well as the larger metropolitan region. Regional commercial uses are typically located at intersection in general proximity to nodes along expressways or major arterial roadways and incorporate or adjacent to high-capacity mass transit system stations facilities. These commercial nodes are typically twenty (20) acres or greater in area. Regional Commercial uses should incorporate welldefined entrances, shared internal circulation, limited curb cuts to expressways and arterial streets, sidewalks and shade trees in parking lots, landscaped yards landscaping between the parking lots and street roadways, and well-designed, monument signage. Examples of regional commercial uses include, but are not limited to, movie theaters, wholesale plant nurseries, automotive repair shops, fitness centers, home improvement centers, hotels and motels, mid- to high high-rise office buildings, and automobile dealerships. Permitted zoning districts: O-1.5, O-2, C-2, C-2, C-3, L, and BP and UD.

• IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

Neighborhood Mixed-Use - contains a mix of residential, commercial, and institutional uses at a neighborhood scale. Within mixed-use buildings, residential units located above first floor are encouraged. Typical first floor uses include, but are not limited to, small office spaces, professional services, and small scale retail establishments and restaurants. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Neighborhood Mixed-Use area to ensure access to housing options and services within close proximity for the local workforce. Where practical, buildings are situated close to the public right-of-way, and parking is located behind buildings. Parking requirements may be minimized using a variety of creative methods, such as shared or cooperative parking agreements, to maximize land available for housing and community services. Pedestrian spaces are encouraged to include lighting and signage, and streetscaping should be scaled for pedestrians, cyclists, and vehicles. Properties classified as Neighborhood Mixed-Use should be located in close proximity to transit facilities. Permitted zoning districts: RM-4, RM-5, RM-6, MF-18, O-1, NC, C-1, MH, MHC, MHP, FBZD, AE-1, and AE-2.

 IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

Urban Mixed-Use - contains a mix of residential, commercial, and institutional uses at a medium level of intensity. Urban Mixed Use development is typically larger-scale than Neighborhood Mixed-Use and smaller-scale than Regional Mixed-Use, although many of the allowable uses could be the same in all three categories. Building footprints may be block-scale, but could be smaller depending on block configuration and overall development density. Typical first floor uses include, but are not limited to, professional services, offices, institutional uses, restaurants, and retail including grocery stores. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Urban Mixed-Use areas to ensure access to housing options and services within close proximity for the local workforce. Structured parking is encouraged in Urban Mixed-Use category, but is not required. Parking requirements may be satisfied through shared or cooperative parking agreements, which could include off-site garages or lots. The Urban Mixed-Use category should be located in proximity to transit facilities. Permitted zoning districts: RM-4, RM-5, RM-6, MF-18, MF-25, MF-33, MF-40, O-1, O-1.5, C-1, C-2, MH, MHP, MHC, FBZD, AE-1, AE-2, AE-3, and AE-4.

• IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

**Regional Mixed-Use** – contains residential, commercial and institutional uses at high densities. Regional Mixed-Use developments are typically located within regional centers and in close proximity to transit facilities, where mid-rise to high-rise buildings would be appropriate. Typical lower floor uses include, but are not limited to, offices, professional services, institutional uses, restaurants, and retail including grocery stores. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Regional Mixed-Use areas to ensure access to housing options and services within close proximity for the local workforce. Where feasible, development is ideally built at the block scale, with minimum building setbacks. Parking requirements may be satisfied through shared or cooperative parking agreements, which can include off-site garages or lots. If parking requirements are satisfied on-site, structured parking is encouraged. Pedestrian spaces are encouraged to be generous in width and lighting, with streetscaping and signage scaled to pedestrians. Regional Mixed Use projects encourage incorporation of transit facilities into development. Permitted zoning districts: MF-33, MF-40, MF-50, MF-65, O-1.5, O-2, C-2, C-3, D, ED, FBZD, AE-1, AE-2, AE-3, and AE-4.

• IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

**Employment/Flex Mixed-Use** – provides a flexible live/work environment with an urban mix of residential and light service industrial uses. Uses include smaller-scale office, retail, art studio warehouses, art-oriented fabrication, creative businesses and work spaces, and cottage industrial and fabrication uses. Adaptive uses of vacant or underutilized structures are encouraged to provide residential urban infill and appropriate employment opportunities within or in close proximity to neighborhoods. Buildings have a smaller footprint and can closely resemble campus-like development across multiple sites or with several multi-functioning buildings on one site. Permitted zoning districts: RM-4, MF-18, MF-25, MF-33, O-1, O-1.5, C-1, C-2, L, TOD, IDZ, AE-1, AE-2, AE-3, and AE-4.

 IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

Business/Innovation Mixed-Use - accommodates industrial uses with office, commercial, and residential uses, all within a cohesive setting, on a larger scale and within larger footprints than the Employment/Flex Mixed-Use category. Industrial arts workshops, high tech fabrication, processing and assembly, and other industrial uses are permitted, in addition to commercial uses. Vocational training, technological learning centers, medical campuses, and research/development institutions are also appropriate for these spaces. Additional environmental performance standards should be employed for properties designated as Business/Innovation Mixed-Use, such as hours of activity, loading, noise levels and lighting, to ensure that the intensity of the industrially oriented uses is comparable to that of the other non-residential uses. The mix of uses may be either vertically or horizontally distributed. Live/work housing options are permissible in Business/Innovation Mixed Use areas to ensure access to housing options and services within close proximity of business innovation areas for the local-workforce. Business/Innovation mixed use should incorporate transit and bicycle facilities to serve the training and employment base. Permitted zoning districts: RM-4, MF-18, MF-25, O-1.5, O-2, C-2, C-3, L, I-1, MI-1, BP, AE-1, AE-2, AE-3, and AE-4.

 IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.

#### FULTON MARKET INNOVATION DISTRICT Aplan to coordinate economic growth, preservation, design.

## **Industrial Land Uses**

Light industrial-Industrial – includes a mix of manufacturing uses, business park, and limited retail/service uses that serve the industrial uses. Industrial uses should be screened and buffered from adjoining non-industrial uses. Any outside storage must-should be under a roof and screened from public view. Examples of light industrial uses include drug laboratories, furniture wholesalers, lumberyards, tamale factories-food production, and warehousing. Permitted zoning districts: L, I-1, MI-1, and BP.

### **Industrial Land Uses**

Heavy industrial Industrial – includes heavy manufacturing, processing and fabricating businesses. Heavy industrial uses shall be concentrated at arterials, expressways, and railroad lines. This use category is not compatible with residential uses and neighborhood-scaled categories or those that permit residential zoning. Heavy Industrial should be separated from residential non-industrial uses by an intermediate allowable land use or a significant buffer. Examples of heavy industrial uses include auto manufacturing, battery manufacturing, and petro chemical bulk storage. Permitted zoning districts: I-1, I-2, MI-1, and MI-2, QD, and SGD

Parks/open-Open space-Space - may includes, but is **not limited to,** large, or linear, or unimproved land where conservation is promoted and development is not encouraged due to **the** presence of topographic constraints or institutional uses on the site. Parks/open Open space Space may include floodplains, utility corridors, and public and or private land uses that encourage outdoor passive or active recreation. Examples include city owned and/or operated pocket, regional, or linear parks, as well as private parks associated with subdivisions and neighborhood associations.

**Agricultural** – includes crop agriculture, ranching, and related agribusiness practices. Single-family detached houses and detached accessory dwelling units are permitted on agricultural and ranch lands at very low densities or in conservation subdivisions that will not interfere with agricultural operations. Limited commercial uses directly serving agricultural and ranching uses, such as farmers markets, nurseries, stables, and bed and breakfasts, are permitted. To maintain scenic qualities, natural vegetative buffers, deeper setbacks, increased signage control, earthen drainage channels, and more restrictive access management standards are desired along major scenic corridors. Floodplain protection and buffer zones along creeks and rivers are instrumental in retaining rural character. Permitted zoning districts: RP and FR.

<u>City/State/Federal Government</u> – includes areas owned and operated by a federal, state, or city agency. Examples may include government offices, public service facilities such as libraries and police stations, military bases, state colleges, and federal courts. This category does not apply to properties owned by a public agency but leased to and operated by another party.
