003 - BACKGROUND

The City of San Antonio ("City") Information Technology Services Department (ITSD) is seeking a technology partner to manage the repurposing of surplus technology equipment on an as-needed basis. The City seeks to extend the life of City purchased technology assets by effectively repurposing surplus technology equipment identified through the City's Computer and Technology Life Cycle Replacement Programs to recipient agencies. Recipient agencies may include non-profit organizations or other charitable organizations preferably within the San Antonio city limits.

This contract will identify a partner to manage an effective technology equipment repurposing program. The selected partner will focus on building a long-term relationship with recipient agencies on behalf of the City.

004 - SCOPE OF SERVICE

4.1 SCOPE:

Repurpose surplus technology equipment to recipient agencies that will provide repurposed technology equipment for use in private homes or for use in a classroom or educational setting for educational program use. We believe this will shift their focus from educational failure and delinquent activity, to academic achievement and productive behavior.

4.1.1 The purpose of the this initiative is to extend the life of City purchased technology assets by effectively repurposing surplus technology equipment identified through the City's Computer Life Cycle Replacement Program to identified recipient agencies that are that are subject to approval by the City. Proper coordination requires chain of custody documentation and a data erasure process to ensure that no City data is exposed. Assets must reach their next destination in a clean state, ready for use by the identified recipient organization.

4.1.2 Respondents are asked to offer a detailed description of the repurposing methodology that can include the potential resale (Remarket) and final disposition through an approved e-waste program (Recycle) to offset potential losses incurred in repurposing surplus technology equipment. The Respondent must show proof of an electronic recycling certification that is recognized by a national accreditation agency. The City is seeking an aspirational goal of at least 70% of repurposed equipment to be sent identified recipient agencies.

4.2 CONTRACTOR REQUIREMENTS:

Contractor shall:

4.2.1 Perform all work safely and follow required safety standards to include but not be limited to Occupational Safety and Health Administration (OSHA) and Federal, State, and City codes and regulations.

4.2.2 Ensure all equipment and tools are well maintained, calibrated and in proper working order before use in the performance of this service. All equipment shall meet OSHA and other safety standards.

4.2.3 Provide all labor, transportation and methods of communication, and if required, additional miscellaneous services necessary to meet requirements of the specified services throughout the term of the contract. Provide dedicated staff for this initiative.

4.2.4 Obtain written approval from the designated City representative for all services requested, prior to work being performed.

4.2.5 Ensure all equipment and tools are well maintained, calibrated and in proper working order before use in the performance of this service. All equipment shall meet OSHA and other safety standards.

4.3 Disposal of Technology Equipment

4.3.1 Contractor must remove all City markings prior to repurposing, resale or disposal.

4.3.2 Contractor must ensure that all City equipment is inspected prior to resale. Any extraneous or extra equipment that may be enclosed, attached, or otherwise not generally considered a part of the asset, must be removed and returned to the City.

4.3.3 Contractor must provide a detailed implementation proposed plan to repurpose, sell or dispose targeted surplus equipment. The vendor's plan should detail processes, including methodology for inventorying

equipment, sanitization and destruction of hard disk drives, and disposal of equipment according to industry recognized and accepted best practices. The vendor's plan should also describe pick up procedures, mode of transport, holding locations, final destinations, and methods of disposal/recycling to include proposed demonstration of federal, state, and local compliance. Contractor shall identify the name, location, type of business, and use to which any of the material generated by the City will be destined for reuse or recycling. Contractor shall identify name, location, and credentials/licenses/permits of any and all final disposal facilities to be used to deposit material that cannot be recycled.

- 4.3.4 Contractor is responsible for providing all labor, equipment, supplies, pallets and transportation required to process and dispose of items from each requested City facility. If items are on pallets, City will allow contractor to do an even swap of pallets as long as they meet the minimum quality standards indicated by City (wooden 40" by 48" pallets that have no broken slats). If pallets do not meet minimum standards, contractor will be required to remove items from City pallets onto their standard of pallets.
- 4.3.5 Contractor shall develop a process for continuous improvement based on success or lessons learned during the first planned repurposing to chart a course for future needs.
- 4.3.6 Contractor will provide regular reporting intervals that may be increased or decreased by the City depending on actual need and contractual obligations.
- 4.3.7 Contractor may be required to scale this solution based on City needs, the identification of new equipment types and / or the replacement of recipient agencies.
