COUNTY OF BEXAR §

SCANNED

TO: THE HONORABLE COMMISSIONERS COURT OF BEXAR COUNTY, TEXAS

The undersigned petitioner ("Petitioner"), acting pursuant to the provisions of Chapter 382 of the Texas Local Government Code, as amended (the "Code"), submit this petition ("Petition") to the Commissioners Court of Bexar County, Texas, to request the creation of a public improvement district, within the extraterritorial jurisdiction ("ETJ") of the City of San Antonio ("City"), Bexar County, Texas ("County"). Specifically, the Petitioner requests that the County create a public improvement district and include the property described in **Exhibit "A"** and **Exhibit "B"** attached hereto ("Subject Property") within such public improvement district. In support of this Petition, the Petitioner presents the following:

Section 1. Petitioner. In compliance with the requirements of the Code, and as determined by the current tax roll of the Bexar County Appraisal District, the Petitioner constitutes: the owner representing more than 50% of the appraised value of taxable real property proposed to be included within the public improvement district proposed in this Petition.

Attached to this Petition is a sworn statement of the Petitioner, affirming the Petitioner is the holder of fee simple title to more than fifty-percent (50%) of the appraised value of taxable real property proposed to be included within the District (as defined below) and is the owner representing more than fifty-percent (50%) of all record owners of property within the proposed District or owns taxable real property that constitutes more than fifty-percent (50%) of the area of all taxable real property within the proposed District. The Petitioner requests for, and consents to, the creation of the District, as set forth in this Petition. The sworn statement of the Petitioner is attached hereto as **Exhibit "C"** and incorporated herein for all purposes.

Section 2. Name. A public improvement district is being requested, which shall be named the "Gates Special Improvement District" (referred to herein as the "District").

Section 3. Boundaries. The proposed boundaries of the District shall include the Subject Property, which is more particularly described in **Exhibit "A"** and **Exhibit "B"** attached hereto and incorporated herein for all purposes. The total acreage of the District is approximately 260 acres total. None of the land to be included in the District is within the corporate boundaries of any municipality and all of the land proposed to be included in the District is in the extraterritorial jurisdiction of the City and in the County.

Section 4. General Nature of the Proposed Public Improvements. The Petitioner requests that the County create a public improvement district and authorize it to engage in economic development projects and grant to the District the powers requested in this Petition. The District proposes to enter into development agreements as are deemed advisable to promote state and local economic development and to stimulate residential and commercial activity in the District. The general nature of the work proposed to be done may include, but is not limited to, onsite roads (including, but not limited to a collector road) and associated utility improvements (water, sewer, and drainage), offsite sewer extension (and if needed, offsite roads, water, and drainage), onsite public improvements for residential lots (sewer, water, streets, and drainage), the improvement and construction of water, sanitary sewer, drainage, dry utilities (gas and electric), detention ponds, storm sewer, impact fees for capacity, road, landscaping in public rights of way,

or sidewalks, right of way acquisition costs, easement acquisition costs, appraisal costs, geotechnical engineering costs, environmental inspection/testing/ and remediation costs, well plugging costs, demolition costs, water and sewer impact fees, floodplain reclamation costs, tree mitigation costs, park/entry/amenity improvement costs, including any cost or expense of purchasing, constructing maintaining, acquiring, owning, operating, repairing, leasing, improving, extending, or paying for inside (i.e. onsite) and outside (i.e. offsite) the district boundaries; flood plain and wetlands regulation and endangered species permits, stormwater permits, including mitigation; and all works, improvements, facilities, plants, equipment, appliances, interest in property, and contract rights needed thereof, and administrative facilities needed in connection therewith, related surveying, engineering, and legal fees, costs and expenses, and all rights of way and other interests in land necessary or convenient in connection therewith, as well as reasonable contingencies, associated with the costs of public improvements. Further, the public improvements financed by the District may include any public improvements in compliance with Chapter 382 and in accordance with the governing laws.

Section 5. Estimated Cost of the Proposed Construction of the Public Improvements. The total estimated capital cost is approximately \$57,200,000. Such costs can be partially offset with the imposition of taxes and the issuance of bonds by the District, as further described herein.

Section 6. Nature of the District & Authority. The District is expressly requested pursuant to Chapter 382 of the Code. The District shall be created for the purposes of a district created and organized under Section 52, Article III, and Section 59, Article XVI of the Texas Constitution, Chapters 380, 381, 382, and 383 of the Code, and for the purposes of creating a program for economic development as provided in Section 52, Article III of the Texas Constitution, and for any other lawful purpose authorized by the governing laws.

The Petitioner specifically requests:

- (1) that the County authorize the District to exercise the powers granted under Chapter 382 of the Code;
- (2) that the County delegate to the District all powers that the County is granted pursuant to Chapter 382; and
- (3) that the County authorize the District to engage in economic development projects, as the District may enter into development agreements which are deemed advisable to promote state and local economic development and to stimulate business and commercial activity in the District.

Section 7. Road Improvements. The Petitioner requests that the County designate and approve the proposed onsite and offsite road improvements as a "Road Improvement Project" and designate and approve such Road Improvement Project as a targeted economic development project, which is of an economic benefit to the District, to the Subject Property within the District, and to the County.

Section 8. Advisory Board. As authorized by the Code, an advisory board may be established by the County to develop and recommend an improvement plan. However, an improvement plan is not necessary or applicable, as the Petitioner does not propose that the District be granted with the power to impose assessments.

Section 9. Management of the District & Board of Directors. The Petitioner specifically requests that the County appoint a seven (7) member Board of Directors to govern the District and approve their respective terms in accordance with Section 382.051 of the Code, as the population of the District is less than 1,000 persons. The Petitioner also requests that the County delegate to the District's Board of Directors

the County's powers and duties provided by Chapter 382 of the Code, in order for the Board of Directors to oversee, manage, and govern the District to the fullest extent authorized by the Code.

Section 10. Taxes and Bonds. The Petitioner requests that County authorize the District to accomplish its purposes and the costs of services and improvements by imposing: (1) an ad valorem tax; (2) a sales and use tax; and (3) a hotel occupancy tax. The District shall also have the authority to issue bonds, negotiate promissory notes, and other District obligations, as further described herein.

The Petitioner specifically requests:

- (1) that the District's proposed improvements be financed and paid for with taxes authorized by Chapter 382 of the Code instead of assessments;
- (2) that the County grant the District authority to impose an ad valorem tax, hotel occupancy tax, and sales and use tax to accomplish the economic development purposes prescribed by Section 52a, Article III, of the Texas Constitution;
- (3) that the County grant the District the authority to impose a hotel occupancy tax in accordance with Section 382.155 of the Code and use the revenue from the tax for any purpose authorized by Chapter 382 of the Code if the owner of the hotel agrees to the imposition of the tax;
- (4) that the County grant the District authority, in accordance with Section 382.152 of the Code, to issue bonds, negotiable promissory notes and other District obligations, which may be secured by District revenue or any type of District taxes, or any combination of taxes and revenue pledged to the payment of bonds; and
- (5) that the County grant the District authority as provided in Sections 382.158 and 382.159 of the Code, regarding borrowing and repayment of costs, respectively.

In regard to the proposed tax rates, the Petitioner specifically requests that the County authorize the District to:

- (1) impose an ad valorem tax not to exceed the City's tax rate;
- (2) impose a sales and use tax with a rate not to exceed two-percent (2%); and
- (3) impose a hotel occupancy tax with a rate of the greater of nine-percent (9%) or the rate imposed by the City.

Section 11. Method of Assessment. The Petitioner does not propose that the District be granted the power to impose assessments, and accordingly, the Petitioner is not required to present a Service Plan, an Assessment Plan (including a method of assessment), or to prepare an Assessment Roll. As stated above, the Petitioner requests that the District's proposed improvement be financed and paid for with taxes authorized by Chapter 382 of the Code instead of assessments.

Section 12. Method of Assessment. Approval and creation of the District will not obligate the County to provide any funds to finance the proposed public improvements. All costs of the District shall be paid by and apportioned to the District, and not to the County, as a whole.

Section 13. Advisability and Feasibility of the District & Best Interests of the County. The District and its proposed improvements and economic development projects appear feasible and are necessary and advisable for the economy of the District and the County. Additionally, the County may create a public improvement district if the County determines it is in the best interest of the County. The area comprising the District is not presently developed, and therefore, the proposed District is necessary to pay for or finance public improvements and economic development within the District. Furthermore, the District will serve the public purpose of promoting and encouraging new residential development in the District and the County, which will encourage employment and economic activity within the District and the County. As

such, the County's creation of the District is in the best interest of the County, as the District and the proposed improvements confer a special benefit on the District, the Subject Property within the District, and the County.

Section 14. Filing with County Clerk. This Petition will be filed with the County Clerk in support of the creation of the District, as described herein.

Section 15. Prayer. This Petition requests that the County create the District, include the Subject Property therein, and grant to the District the powers requested in the Petition. The Petitioner pray that this Petition be heard and the Commissioners Court sets a hearing date, publishes notice of, conducts a hearing, makes certain findings, and enters an Order creating the District in a manner authorized under Chapter 382 of the Code and as described herein.

Signature on the Following Page

Wherefore, this Petition satisfies all of the requirements of the Code for the creation of the District, and the Petitioner respectfully request the County create the District and include the Subject Property within such District, as described herein.

Respectfully submitted, this 14 day of May, 2019.

V. WRITTEN AGREEMENT REGARDING SERVICES

5.1 In the event the City annexes the Annexation Area pursuant to this Agreement, the Parties agree that this Section V of this Agreement shall constitute a Written Agreement Regarding Services required under Chapter 43, section 43.0672 of the Code; shall run with the land; and shall govern all municipal services to be provided to the Annexation Area. The City shall be under no further obligation to negotiate services with any subsequent owners of any property located or developed within the Annexation Area other than the services set forth herein, provided that upon annexation of the Annexation Area, if the municipal services have changed or otherwise include additional services not referenced herein, the City will provide all municipal services to the Annexation Area that apply to other properties located within the city limits within no more than 3 years from the date of annexation. The Agreement Regarding Services shall survive termination of this Agreement only to the extent the City annexes the Annexation Area pursuant to this Agreement.

In general, this Agreement Regarding Services includes three service components: *(1) Annexation Service Requirements, (2) Additional Services and (3) a Capital Improvement Program.* Providing services includes having services provided by any method or means by which the City extends municipal services to any other area of the City. This may include causing or allowing private utilities, governmental entities and other public and private non-profit service organizations to provide such services by contract in whole or in part. It may also include separate agreements with associations or similar entities. Services are provided and fees are assessed in accordance with the City's Code of Ordinances, as may be amended.

1. Annexation Service Requirements – The following services will be provided in the Annexation Area commencing on the effective date of the annexation for full purposes, unless otherwise noted.

- A. Police Protection** – The San Antonio Police Department (SAPD) will provide protection and law enforcement services in the Annexation Area within the time frame established in section 5.1.

These services include:

- Routine patrols and responses;
- Handling of complaints and incident reports;
- Special units, such as traffic enforcement, criminal investigations, covert operations, K-9 Unit, Family Assistance Crisis Teams, Bomb Squad, and Special Weapons and Tactics Team (SWAT); and
- Any other services or programs provided to the citizens of San Antonio at the time of annexation.

The Annexation Area will become part of an existing patrol district based upon factors such as the size of the area, population, and the expected number of calls for service. These factors will also determine the need for hiring additional patrol officers to ensure all patrol districts are adequately staffed 24 hours a day, seven days a week, and to maintain an average response time. SAPD San Antonio Fear Free Environment Unit (SAFFE) officers will be available to meet as requested to discuss police issues.

Police Substations are responsible for a Patrol "Service Area," under the command of a Captain. These Service Areas are divided into Patrol Sections. The Patrol Sections, with supervisory responsibilities assigned to Sergeants, are divided into "Patrol Districts." The "Patrol Districts" are geographically defined areas established for several reasons, including but not limited to:

- Serving as a manpower distribution tool based on call volume, population, area size, and geographic variables;
- Providing a means of establishing primary responsibility to individual officers, during their tour of duty, for various activities within a specific geographic area; and
- Providing an efficient and effective means of assigning, identifying, and locating officers, within a generalized area, using currently available technology.

The Annexation Area will be served by the substation assigned to that geographic area. There is no specific number of officers that can be assigned to a patrol district. Patrol districts are staffed with at least one officer, 24 hours a day, seven days a week. Many times, multiple officers are assigned to single districts.

Police services are initiated by on-sight officer activity, citizen requests, and any other means available. The most common means by which officers receive their assignments is through direct supervisory command and radio/computer transmissions by police dispatchers.

B. Fire Protection and Emergency Medical Service (EMS) – The San Antonio Fire Department (SAFD) will provide fire protection services and EMS service. Service will be provided through the use of fire engines, ladder trucks, full-time and peak period EMS

ambulances, Medical Officers and Chief Officers. SAFD will be providing fire protection and EMS from the station assigned to that geographic area.

C. Solid Waste Collection Services – Solid Waste Collection services are provided and fees are assessed in accordance with Chapter 14 of the City' Code of Ordinances, as may be amended. Fees for services are assessed monthly on CPS Energy Utility bills. If private collection services are used, the City solid waste fees will not be assessed.

Commercial Solid Waste Services – The City's Commercial collection for garbage are available on a case by case basis for qualifying businesses in a manner similar to residential services. Bulky item, brush and bagged leaf collections are not provided to businesses. If the City-provided commercial service is not desired, businesses may utilize private service providers.

D. Operation and Maintenance of Water and Wastewater Facilities – San Antonio Water System (SAWS) will maintain and operate the public water and wastewater facilities that are within its certified service area. Routine standard maintenance of the facilities is performed on a scheduled basis. Emergency maintenance and repairs receive immediate attention, and are available 24 hours a day, 7 days a week. The facilities will be maintained and operated in accordance with standard SAWS policies and procedures, and under the provisions of the SAWS Utility Service Regulations for the extension of facilities.

SAWS Monthly Rates – The SAWS rate structure is designed to provide balance between residential and business rates and to encourage conservation with rates that increase at higher levels of consumption. SAWS customers, after annexation, will pay the lower Inside City Limit rate as opposed to the Outside City Limit rate.

SAWS Water Conservation Programs and Rebates – SAWS water conservation education programs and rebates are available to SAWS customers. Currently commercial customers account for 6.0% of the customer base and 35.1% of SAWS' annual water sales, there is great potential for water savings through commercial conservation programs. Commercial customers also have access to water conservation education and incentives. There are programs to make irrigation systems more efficient and customer rebates for big projects that address operational efficiencies. Detailed information on these and other programs can be found on the SAWS website at www.saws.org.

Water service and wastewater service will be provided to the Annexation Area. Notwithstanding any provision herein to the contrary, this Agreement will not terminate, reduce, or otherwise affect any approved Equivalent Dwelling Units ("EDUs") allocated to the Annexation Area or any Utility Service Agreement ("USA") applicable to the Annexation Area.

E. Operation and Maintenance of Roads and Streets, including Street Lighting – The Transportation and Capital Improvements Department (TCI) is responsible for the maintenance and repair of streets, bridges, alleys and related infrastructure within the City's jurisdiction. Curbs, sidewalks, driveway approaches, curb ramps, and other street

infrastructures are constructed in accordance with the City and the Americans with Disability Act (ADA) standards. Service requests or community concerns for TCI's response, such as pothole and base and pavement repairs are initiated through the City's 311 call center or online services. These services include:

- Emergency Pavement Repair
- Street Base and Pavement Repair
- Preventative Street Maintenance
- Guard Post and Guard Rail Maintenance
- De-icing and Snow Removal Services
- Neighborhood Access and Mobility Program (NAMP)
- Emergency Street Closure Services
- Street Re-striping and Marking Services

Infrastructure Management Program (IMP) is a five-year rolling program which focuses on the maintenance of the City infrastructure. Service needs are identified city-wide and are scheduled for street maintenance, alley maintenance, drainage maintenance, sidewalks, traffic signals, pavement marking and Advance Transportation District (ATD) projects. The IMP provides the City a structured program schedule, potential for additional multiple year contract awards and improved utility coordination. During the budget process for each fiscal year of the City, the IMP is presented to City Council for approval. Amendments may occur throughout the year due to coordination with utilities or unforeseen conditions, such as inclement weather. The goal of the IMP is to provide the best possible maintenance for the City.

Transportation Systems Management & Operations – If necessary, TCI will provide regulatory signage services.
