MEMORANDUM OF UNDERSTANDING

This Memorandum of Understanding, (the "MOU"), is entered into by and between the Department of State Health Services ("DSHS"), an agency of the State of Texas, and the City of San Antonio Metropolitan Health District ("Clinic"), (collectively, the "Parties"), in the effort to set out the roles and responsibilities between the Parties regarding medications available through the DSHS Inventory Tracking Electronic Asset Management System (ITEAMS) platform to treat and control the spread of infectious disease across Texas to achieve improved public health outcomes.

RECITALS

WHEREAS, DSHS purchases medications with state and federal funds allocated to DSHS for specific public health purposes, and are to be administered or dispensed in compliance with federal program regulations;

WHEREAS, the Clinic obtains medications through the ITEAMS platform for the outpatient treatment of sexually transmitted diseases (STD) or for tuberculosis (TB) services; and

WHEREAS, for the TB medications, this MOU only applies to local health departments and entities who are pre-authorized to order medications for TB services.

NOW THEREFORE, in consideration of the mutual promises set forth herein and other good and valuable consideration, the sufficiency of which is hereby acknowledged, the Parties agree as follows:

- A. The Clinic must ensure medications are used only for the treatment of STDs and TB;
- B. The Clinic must ensure STD medications are used only for uninsured or underinsured patients as defined by DSHS;
 - Underinsured definition: A patient who experiences any circumstance that might influence or restrict access to necessary preventive health care services or medication. These circumstances might include, but are not limited to, patients who are concerned about privacy to use their insurance or have a financial burden due to high deductibles or co-pays, any patient whose provider would not be able to provide timely treatment, or any partner of a contact identified through disease intervention specialist (DIS)/contact tracing.

- It is the responsibility of the clinic to maintain documentation of the patients' uninsured or underinsured status.
- 3. The Clinic must have a Class D Pharmacy license. Clinics without a Class D Pharmacy license are only permitted to order medications under a physician's license for direct administration to patients onsite in the clinic and for patient-delivered partner therapy using single-dose oral medications for chlamydia and gonorrhea. i.e. azithromycin and cefixime.
- C. The Clinic must distribute medications at no charge to the patient;
- D. The Clinic must not seek third party reimbursement, including Medicaid reimbursement, for the medications that are provided at no cost to the clinic;
- E. The Clinic must ensure that medications are not sold or exchanged for profit to another individual or entity for any reason;
- F. DSHS has the authority to direct medications to be redistributed in the event of a medication shortage or to meet identified public health needs, this only applies to Local Health Departments authorized under Texas Health & Safety Code Chapters 81 and 121 to prevent and control communicable diseases, specifically syphilis;
 - 1. As specified by the terms of the DSHS federal funding agreement, Benzathine penicillin G can be provided to patients whose providers are not able to administer timely treatment for syphilis with Benzathine penicillin G.
 - 2. In these critical public health situations, Benzathine penicillin G should be provided under medical orders of the medical director of the local health department.
 - The clinical service provider administering the Benzathine penicillin G must provide necessary documentation, including a medical record related to the patient need for the treatment administered under this order.
 - 4. The medical director of the local health department must retain documentation, including a medical record, for all patients treated under his or her order.
- G. The Clinic must have a designate staff member who oversees the ordering, provision, reconciliation, and reporting of medications obtained through the ITEAMS platform. Reconciliation of medications must occur monthly, as defined by the DSHS Pharmacy Branch;
- H. The Clinic must have manual or electronic tracking procedures to demonstrate that all ITEAMS medications administered or dispensed have been appropriately provided to an eligible patient of clinical services in an outpatient setting;
- The Clinic must maintain records containing information that would establish appropriate use of medications that can be requested and audited in an internal review at any time to ensure compliance. Records include, but are not limited to, billing records, medication tracking logs, and relevant patient records;

- J. The Clinic must ensure medications for the treatment of STDs comply with current policies and procedures outlined by the DSHS HIV/STD Program, which can be accessed at: <u>https://www.dshs.texas.gov/hivstd/policy/;</u> and
- K. The Clinic must ensure medication for TB services must comply with current policies and procedures outlined by the DSHS Tuberculosis and Hansen's Disease Branch in the Texas Tuberculosis Work Plan, which can be accessed at: https://www.dshs.texas.gov/idcu/disease/tb/policies/.
