Procurement Alternative:	Should this contract not be approved, the City will be required to perform services in-house which would require additional staffing, equipment and materials for maintenance services to the natural creekways of Leon and Salado Creeks by the Transportation and Capital Improvements staff. Non-approval of this request may increase the build-up of litter and debris, dead limbs, etc. which may cause bridge infrastructure damage and thus restrict the proper flow of water within the drainage system or creekway and increase potential flooding to the residents of the community.
