Land Use Analysis

Sector Plan Criteria for review:

- The recommended land use pattern identified in the North Sector Land Use Plan inadequately provides appropriate optional sites for the land use change proposed in the amendment.
- The amendment must constitute an overall improvement to the Sector Plan and will not solely benefit a particular landowner or owners at a particular point in time.
- The amendment must uphold the vision for the North Sector Plan.

The applicant requests this plan amendment and associated zoning change in order to rezone to "MF-50" Multi-Family Residential District. The subject property is currently vacant. The requested Mixed Use classification supports the North Sector Plan objectives of locating high density residential developments near the intersections of Highway 281 and Loop 1604. In addition, a high density residential development will serve as a buffer between the highway and the lower density residential developments to the north and east.

The amendment will not adversely impact a portion of, or the entire Planning Area by:

- Significantly altering acceptable existing land use patterns, especially in established neighborhoods.
- Affecting the existing character (i.e. visual, physical, and functional) of the immediate area.
- Creating activities that are not compatible with adjacent neighboring uses, and, particularly, the mission of Camp Bullis.
- Significantly alter recreational amenities such as open space, parks, and trails.

The Plan Amendment will ensure compatibility of surrounding lands and future development. The Mixed Use Center designation is appropriate for the proposed development on the subject property.

ALTERNATIVES:

1. Recommend denial of the proposed amendment to the North Sector Plan, as presented above.
2. Make an alternate recommendation.
3. Continue to a future date.

FISCAL IMPACT:

None.

RECOMMENDATION:

Staff recommends Approval. The requested Mixed Use classification supports the North Sector Plan objectives of locating high density residential developments near the intersections of Highway 281 and Loop 1604. In addition, a high density residential development will serve as a buffer between the highway and the lower density residential developments to the north and east.

PLANNING COMMISSION RECOMMENDATION: Approval (8-0).
