ISSUE:

None.

ALTERNATIVES:

Denial of the requested zoning change would result in the subject property retaining the present zoning district designation of "I-1". This district accommodates areas of heavy and concentrated fabrication, manufacturing and industrial uses which are suitable based upon adjacent land uses, access to transportation and the availability of public services and facilities. It is the intent of this district to provide an environment for industries that is unencumbered by nearby residential or commercial development. "I-1" must be located in areas where conflicts with other uses can be minimized to promote orderly transitions and buffers between uses. These districts are located for convenient access for existing and future arterial thoroughfares and railway lines. These districts are in many instances separated from residential areas by business or light industry areas or by natural barriers; where they are adjacent to residential areas some type of artificial separation may be required.

FISCAL IMPACT:

None.

Proximity to Regional Center/Premium Transit Corridor

The subject property is not located within a Regional Center, but is located within a half-mile of the Looper Premium Transit Corridor.

RECOMMENDATION:

Staff Analysis and Recommendation: Staff and Zoning Commission (10-0) recommend Approval.

Criteria for Review: According to Section 35-421, zoning amendments shall be based on the approval criteria below.

1. Consistency:

The subject property is located within the Stinson Airport Vicinity Land Use Plan and is currently designated as "Neighborhood Commercial" in the future land use component of the plan. The requested "C-1" base zoning is compatible with the future land use designation and is consistent with the surrounding properties.

2. Adverse Impacts on Neighboring Lands:

Staff finds no evidence of likely adverse impacts on neighboring lands in relation to this zoning change request. The requested "C-1" base zoning will have less potential for adverse impact on neighboring lands than the current "I-1" base zoning district.

3. Suitability as Presently Zoned:

The current “I-1” General Industrial District is not an appropriate zoning for the property and surrounding area. Industrial uses are not recommended adjacent to residential areas.

4. Health, Safety and Welfare:

Staff has not found indication of likely adverse effects on the public health, safety, or welfare.

5. Public Policy:

The proposed rezoning does not appear to conflict with the following goals, principles, and objectives of the Stinson Airport Vicinity Land Use Plan.

Stinson Airport Vicinity Land Use Plan Relevant Goals and Objectives:

- Goal I: Protect the quality of life of residents including health, safety and welfare

6. Size of Tract:

The subject property is 1.2672, which would adequately support a retail strip including a medical or dental clinic.

7. Other Factors:

The purpose of the Specific Use Authorization is to provide for certain uses which, because of their unique characteristics or potential impacts on adjacent land uses, are not generally permitted in certain zoning districts as a matter of right, but which may under the right set of circumstances and conditions be acceptable in certain specific locations.
