ISSUE:

None.

ALTERNATIVES:

Current: The present zoning district designation of “R-6” Residential Single Family provides areas for medium- to high-density, single-family residential uses where adequate public facilities and services exist with capacity to serve development. This district is composed mainly of areas containing single-family dwellings and open area where similar residential development seems likely to occur. Residential single-family provides minimum lot size and density requirements in order to preserve neighborhood character

Proposed: “MF-18” Limited Density Multifamily Districts allows for a maximum density of up to eighteen (18) units per acre, depending on unit size. An "MF-18" district designation may be applied to a use in a residential neighborhood that contains a mixture of single-family and multi-family uses or in an area for which limited density multi-family use is desired. An "MF-18" district may be used as a transition between a single-family and higher intensity uses.

FISCAL IMPACT:

None.

PROXIMITY TO REGIONAL CENTER/PREMIUM TRANSIT CORRIDOR:

The property is part of the Medical Center Regional Center and is not within premium transit corridor.

RECOMMENDATION:

Staff Analysis and Recommendation: Staff and Zoning Commission (8-0) recommend Approval.

Criteria for Review: According to Section 35-421, zoning amendments shall be based on the approval criteria below.

1. Consistency:

The subject property is located within the Medical Center Area Regional Center Plan and is currently designated as “Urban Mixed Use” in the future land use component of the plan. The requested “MF-18” base zoning district is consistent with the future land use designation.

2. Adverse Impacts on Neighboring Lands:

Staff does not find evidence of likely adverse impacts on neighboring lands in relation to this zoning change request.

3. Suitability as Presently Zoned:

The current “R-6” zoning is appropriate for the property and surrounding area. The proposed “MF-18” is more appropriate zoning for the surrounding land uses since there is intense commercial adjacent to the property on the east and multi-family would serve as a good transition to the “R-6” single family uses to the west.

4. Health, Safety and Welfare:

Staff has not found indication of likely adverse effects on the public health, safety, or welfare.

5. Public Policy:

The proposed rezoning does not appear to conflict with the following goals, principles, and objectives of the Medical Center Area Regional Center Plan:

- HOU-1.1 Consider innovative allowances in zoning amendments that promote a variety of housing types in the North Sector and embrace flexible standards, including, but not limited to: zero lot lines, clustering of development, and density bonuses as per the Sector Land Use Plan.
- HOU-2.3 Utilize High Density Residential as a buffer between principal and arterial roadways / non-residential (i.e. office, retail, commercial uses) and lower density residential housing.
- HOU-2.4 Consider the use of High Density Residential along the periphery of concentrated employment areas to foster a compatible land use transition between single family detached/attached residential neighborhoods and concentrated locations of non-residential uses.

6. Size of Tract:

The subject property is 7.117 acres, which could reasonably accommodate limited density multifamily uses.

7. Other Factors:

None.
