STAFF ANALYSIS AND RECOMMENDATION:

Staff Analysis and Recommendation: Staff and Planning Commission (7-0) recommend Approval.

The Plan Amendment to “Suburban Tier” would allow them to request to rezone to “PUD R-4” Planned Unit Development Residential Single zoning, which would allow for clustered development that is more suited to the topography, infrastructure, and natural systems. The land use designation would be consistent with nearby “Suburban Tier” and the style of surrounding subdivisions.

The proposed plan amendment does not appear to conflict with the following goals, principles, and objectives of the North Sector Plan:

HOU-1.1 Consider innovative allowances in zoning amendments that promote a variety of housing types in the

North Sector and embrace flexible standards, including, but not limited to: zero lot lines, clustering of development, and density bonuses as per the Sector Land Use Plan.

Sector Plan Criteria for review:

- The recommended land use pattern identified in the North Sector Land Use Plan inadequately provides appropriate optional sites for the land use change proposed in the amendment.
- The amendment must constitute an overall improvement to the North Sector Plan and will not solely benefit a particular landowner or owners at a particular point in time.
- The amendment must uphold the vision for the future of the North Sector Plan.

The amendment will not adversely impact a portion of, or the entire Planning Area by;

- Significantly altering acceptable existing land use patterns, especially in established neighborhoods.
- Affecting the existing character (i.e. visual, physical, and functional) of the immediate area.
- Creating activities that are not compatible with adjacent neighboring uses, and, particularly, the mission of Camp Bullis Army Base.
- Significantly alter recreational amenities such as open space, parks, and trails.

ALTERNATIVES:

1. Recommend denial of the proposed amendment to the North Sector Plan, as presented above.
2. Make an alternate recommendation.
3. Continue to a future date.
