Current Use: Callaghan Road

Direction: South

Future Land Use Classification: Specialized Center

Current Use: I-1

Direction: West

Future Land Use Classification: Specialized Center

Current Use: I-1

### **LAND USE ANALYSIS:**

#### **Sector Plan Criteria for review:**

- The recommended land use pattern identified in the West/Southwest Sector Land Use Plan inadequately provides appropriate optional sites for the land use change proposed in the amendment.
- The amendment must constitute an overall improvement to the Sector Plan and will not solely benefit a particular landowner or owners at a particular point in time.
- The amendment must uphold the vision for the future of the West/Southwest Sector Plan.

While the West/Southwest Sector Plan provides other areas with the requested land use classification, the proposed Plan Amendment to Specialized Center will provide support to the expansion of research institute. The development of the subject property with the Specialized Center use classification will contribute toward the West/Southwest Sector Plan's vision of compatibility by not significantly altering the existing development pattern.

The applicant requests this Plan Amendment and associated zoning change in order to integrate the subject property which is contiguous with the research facility. The current property is vacant and unused. The subject property is a research institute. The Southwest Research Institute purchased the former Army Reserve Center and acquired the abandoned portion of Old Callaghan Road. The Southwest Research Institute plans to use the property in the furtherance of its research purposes as part of larger research campus. The property is already integrated to the campus and secured from public access. The proposed amendment to Specialized Center use will not significantly alter the land use pattern or character of the immediate area as the proposed change is compatible with the already-existing surrounding pattern of development.

#### **The amendment will not adversely impact a portion of, or the entire Planning Area by;**

- Significantly altering acceptable existing land use patterns, especially in established neighborhoods.
- Affecting the existing character (i.e. visual, physical, and functional) of the immediate area.
- Creating activities that are not compatible with adjacent neighboring uses, and, particularly, the mission of

Camp Bullis.

- Significantly alter recreational amenities such as open space, parks, and trails.

The proposed Plan Amendment to Specialized Center will provide support to the expansion of research institute and allow the applicant to seek the appropriate zoning classification. The development of the subject property with the Specialized Center use classification will contribute toward the West/Southwest Sector Plan's vision of compatibility by not significantly altering the existing development pattern. The General Urban Tier land use classification would support the goals of the West/Southwest Sector Plan. The proposed change is not anticipated to pose any negative impact on military operations or adversely affect any recreational amenities in the area.

**ALTERNATIVES:**

1. Recommend denial of the proposed amendment to West/Southwest Sector Plan.
2. Make an alternate recommendation.
3. Defer the application to a future date.

**FISCAL IMPACT:**

None.

**RECOMMENDATION:** Staff recommends approval. The proposed Plan Amendment to Specialized Center will provide support to the expansion of research institute and will allow the applicant to seek the appropriate zoning classification. The development of the subject property with the Specialized Center use classification is consistent with the land use designation of the West/Southwest Sector Plan and compatible with the existing development pattern.
