RECOMMENDATION:

Staff Analysis and Recommendation: Approval

Denial of the request will allow single-family residential uses.

Criteria for Review: According to Section 35-421, zoning amendments shall be based on the approval criteria below.

1. Consistency:

The subject property is located within the North Central Neighborhoods Community Plan and is currently designated as Low Density Residential in the future land use component of the plan. The requested “R-5” base zoning district is consistent with this designation.

Low Density Residential encourages residential neighborhoods of low to medium density, and supports compatible in-fill development. Therefore, a conditional use for a duplex dwelling is consistent with the land use.

2. Adverse Impacts on Neighboring Lands:

Staff finds no evidence of likely adverse impacts on neighboring lands in relation to this zoning change request.

3. Suitability as Presently Zoned:

The current “R-5” base zoning district is appropriate for the subject property’s location given proximity to other single-family residential uses.

4. Health, Safety and Welfare:

Staff has found no indication of likely adverse effects on the public health, safety, or welfare.

5. Public Policy:

The rezoning request does not appear to conflict with any public policy objective. Low Density Residential encourages residential neighborhoods of low to medium density, and supports compatible in-fill development. Therefore, a conditional use for a duplex dwelling is consistent with the land use.

6. Size of Tract:

The subject property totals 0.1148 acres in size, which adequately accommodates the uses permitted in “R-5”.

7. Other Factors:

Any development of the property shall be consistent with the surrounding neighborhood and in compliance with the City of San Antonio’s Unified Development Code.
