**RECOMMENDATION:**

**Staff Analysis and Recommendation:** Staff recommends Approval

**Criteria for Review:** According to Section 35-421, zoning amendments shall be based on the approval criteria below.

**1. Consistency:**

The subject property is located within the Highlands Community Plan and is designated as Low Density Residential. The base zoning request is consistent with the current land use designation. The property lot consists of two legal lots. The property is big enough that will accommodate such proposal and will not affect the density of the area.

**2. Adverse Impacts on Neighboring Lands:**

Staff has found no indication of likely adverse effects on the public health, safety or welfare.

**3. Suitability as Presently Zoned:**

The Low Density Residential land use classification allows single-family residential development on individual lots to include duplexes as well as granny flats if the property owner resides on the property. There is an existing building within two lots therefore the proposed four (4) residential unit development does meet the land use classification criteria and surrounding uses.

**4. Health, Safety and Welfare:**

Staff has found no indication of likely adverse effects on the public health, safety, or welfare.

**5. Public Policy:**

The request does not appear to conflict with any public policy objective.

**6. Size of Tract:**

The subject property is 0.5234 acres which accommodates the proposed development with adequate space for parking.

**7. Other Factors:**

The subject property was originally zoned “B” Residence District which allowed the development of a two-

family dwelling. The original zoning changed as a result of a code conversion and per Chapter 35, Sec. D101 (j), the development of a duplex or two (2) residential units is allowed by right.
