RECOMMENDATION:

Staff Analysis and Recommendation: Staff and Zoning Commission (9-0) recommend Denial.

Criteria for Review: According to Section 35-421, zoning amendments shall be based on the approval criteria below.

1. Consistency:

The subject property is located within the Eastern Triangle Neighborhood Plan and is designated as High Density Mixed Use. The requested "IDZ" base zoning district is consistent with the future land use designation.

2. Adverse Impacts on Neighboring Lands:

The introduction of an intense commercial use in the middle of a single-family community runs contrary to the established planning principal that stresses the separation of incompatible uses.

3. Suitability as Presently Zoned:

The existing "R-4" base zoning district is consistent with the future land use plan as well as the development pattern. The "IDZ" with residential use may be appropriate for the property. However, the proposed "IDZ" Infill Development Zone with uses permitted in "C-2" Commercial District and Motor Vehicle Sales is not appropriate for the subject property.

4. Health, Safety and Welfare:

The introduction of commercial and motor vehicle sales uses would establish too intense of a use in close proximity to single-family homes.

5. Public Policy:

Motor vehicle sales is a use permitted in "C-3". The High Density Mixed Use future land use category supports zoning as intense as "C-2". The requested "C-3" use is too intense for the property.

6. Size of Tract:

The subject property measures 0.2388 acres which accommodates the existing development, but is small for a

motor vehicle sales lot.

7. Other Factors:

Infill Development Zone (IDZ) provides flexible standards for developments. IDZ is to encourage and facilitate development on vacant, bypassed lands, or the redevelopment of underutilized buildings or structures, within existing built-up areas. IDZ may be approved as either a base zoning district or an overlay zoning district. Standards required in an IDZ district shall apply to either IDZ base zoning or the IDZ overlay district except where otherwise specifically stated. Typically IDZ gives flexibility to parking requirements, lots sizes, and setbacks.
