RECOMMENDATION:

Staff Analysis and Recommendation: Staff recommends Denial.

Criteria for Review: According to Section 35-421, zoning amendments shall be based on the approval criteria below.

1. Consistency:

The property is located within the Near Northwest Community Plan, and is currently designated as “Urban Low Density Residential” in the future land use component of the plan. The requested “R-4” Residential Single-Family base zoning district is consistent with the future land use designation.

2. Adverse Impacts on Neighboring Lands:

The requested fourplex is too dense for the neighborhood and is the only multi-family dwelling in the immediate area. The density of the request would be 22 units per acre; when compared to the surrounding single-family uses, the proposed density is out of character.

3. Suitability as Presently Zoned:

The current “R-4” base zoning district is appropriate for the subject property’s location. With the current “R-4” zoning, a duplex is permitted by right due to the former 1938 “B” to 2001 “R-4” conversion, so long as the lot is a minimum of 6,000 square feet, and meets the 20 foot front setback, 5 foot side setback, and 20 foot minimum rear setback of twenty (20) percent of the lot depth or 20 feet, whichever is less.

4. Health, Safety and Welfare:

This property would adversely affect the welfare of the surrounding area due to the intense density.

5. Public Policy:

Placing a dense residential use mid-block of a single-family community runs contrary to the widely accepted planning principles of separating incompatible uses.

6. Size of Tract:

The subject property totals 0.1837 acres in size, which should reasonably accommodate the uses permitted in “R-4” Residential Single-Family District.

7. Other Factors:

The purpose of the Conditional Use is to provide for certain uses which, because of their unique characteristics or potential impacts on adjacent land uses, are not generally permitted in certain zoning districts as a matter of right, but which may under the right set of circumstances and conditions be acceptable in certain specific locations.
