RECOMMENDATION:

Staff Analysis and Recommendation: Staff and Zoning Commission (11-0) recommend Approval.

Criteria for Review: According to Section 35-421, zoning amendments shall be based on the approval criteria below.

1. Consistency:

The subject property is currently not located within any adopted land use plan and has no land use classification. Therefore a finding of consistency is not required. However, staff finds the requested zoning change is consistent with the existing development pattern of multi-family uses.

2. Adverse Impacts on Neighboring Lands:

Staff finds no evidence of likely adverse impacts on neighboring lands in relation to this zoning change request. The requested zoning change for multi-family housing for a duplex, blends in with the surrounding residentially zoned properties of the area that include duplexes and multi-family housing.

3. Suitability as Presently Zoned:

The current "O-1" base zoning district is not appropriate for the subject property's location. The requested multi-family zoning for a duplex is more appropriate for the area. The surrounding properties to the west, south, and east are all zoned multi-family.

4. Health, Safety and Welfare:

Staff has found no indication of likely adverse effects on the public health, safety, or welfare. The surrounding land uses are all multi-family properties. The requested zoning change to allow for a multi-family housing for a duplex will fit in with the surrounding land uses.

5. Public Policy:

The rezoning request does not appear to conflict with any public policy objective.

6. Size of Tract:

The subject property totals 0.2680 acres in size, which should reasonably accommodate the uses permitted in “MF-33” Multi-Family District.

7. Other Factors:

None.
