ALTERNATIVES:

A. Cleaning and Sanitation of Vehicles for SAPD and SAFD - Should this contract not be approved, the SAPD would be required to hire trained and certified bio-technicians to be on staff to perform these services resulting in increased costs to the department. In addition, SAPD will be required to purchase materials on an as needed basis, wherein increased costs due to non-contract buying could be realized and increase vehicle down time.

B. Dadee/Scorpion Refuse Truck Body Parts - Should this contract not be approved, increased costs could be incurred by the Solid Waste Management Department due to processing individual procurements as needed.

Replacement equipment would have to be purchased or rented if equipment repairs could not be performed.

C. Cartegraph Upgrades with Maintenance & Support - The software provided by Cartegraph Systems, LLC is a proprietary-owned product. Should this contract not be approved, TCI would need to go back to the competitive bid process to identify a new vendor and product to provide these services.

D. Maintenance, Repair and Operating Supplies - Should this contract not be approved, City departments will be required to procure materials on an as needed basis. The City could lose the pricing advantage afforded through the cooperative contract. While the items could be solicited individually, the department's budget could be negatively impacted through price variations and longer delivery lead times.

E. Amendment 3 to the EBSCO Database subscription licenses - Should this contract not be approved, patrons of the San Antonio Public Library system would have to manually conduct their own research from various platforms that could be time consuming. Patrons would not be afforded the opportunity to utilize electronic databases that will provide an access point to quickly deliver research information required for personal, academic, or work-related use.
