Comprehensive Plan

Comprehensive Plan Component: North Central Community Plan

Plan Adoption Date: February 14, 2002

Plan Goals:

Objective 5.1: Work with private developers and builders, non-profit housing corporations, city departments, and housing agencies to identify potential areas for residential in-fill housing, targeting existing vacant lots.

Comprehensive Land Use Categories

Land Use Category: “Low-Density Residential”

Description of Land Use Category: Medium Density Residential includes small lot single family development, accessory dwellings, duplexes, cottage houses, triplexes, fourplexes, and townhomes. Exhibiting a medium density, this category provides for a diversity of residential development while still maintaining an overall urban residential character. Typically, Low Density Residential uses are found within this classification, and should be located in the center of the neighborhood, with Medium Density Residential being located at the edges of the neighborhood.

Permitted Zoning Districts: RM-4, RM-5, RM-6

Land Use Category: “High Density Residential”

Description of Land Use Category:

High Density Residential provides for compact development consisting of the full spectrum of residential unit types, and includes apartments and condominiums. All residential uses can be found within this classification. High Density Residential is typically located along or in the vicinity of major arterials or collectors, often in close proximity to commercial and transportation facilities. This classification may be used as a transition between Low Density Residential or Medium Density Residential uses and non-residential uses. Appropriate buffering should be required between High Density Residential uses and other residential uses. High Density Residential uses should be located in a manner that does not route traffic through other residential uses, often in close proximity to commercial and transportation facilities.

Permitted Zoning Districts: MF-25, MF-33, MF-40, MF-50

Proximity to Regional Center/Premium Transit Corridor

The property is located within the Greater Airport Area Regional Center. The property is located within a ½ of a mile of the Premium Transit Corridor.

RECOMMENDATION:

Staff Analysis & Recommendation: Staff recommends Denial as proposed.

The proposed “High Density Residential” would allow for intense, but fragmented development within the interior of a block that would be inconsistent with the residential character of the neighborhood. Staff recommends amending the plan for all of Block 20 from “Low Density Residential” to “High Density Residential”, rather than the proposed 3 lots. This would allow a more consistent planning pattern across the block with direct access to the freeway.

ALTERNATIVES:

1. Recommend Approval.
2. Make an alternate recommendation.
3. Continue to a future date.
