SUBJECT:

Authorization of an Agreement with the University of Texas Health Science Center at Tyler

SUMMARY:

This Ordinance authorizes a Professional Services Agreement (PSA) with the University of Texas Health Science Center at Tyler (UTHSCT) for tuberculosis (TB) physician services related to the treatment of patients with Latent TB Infection (LTBI) as part of the San Antonio Metropolitan Health District's (Metro Health) participation in the Texas Department of State Health Services Tuberculosis Identification and Treatment Project (DSHS TB Project), a project of the Texas Medicaid 1115 Waiver for an amount not to exceed \$199,052.00 for a term beginning October 1, 2019 to September 30, 2021.

BACKGROUND INFORMATION:

As the local health department for the City of San Antonio and Bexar County, Metro Health's TB Clinic operations comprises of patient care for active and latent TB patients. The UTHSCT Heartland National TB Center is one of four Centers of Excellence in the United States, and is the only one in Texas funded by the Center for Disease Control and Prevention's Division of TB Elimination, to provide medical and technical consultation services related to various aspects of TB control. As such, the UTHSCT is the only entity with this level of expertise available within the state to provide these services. Metro Health has contracted with UTHSCT for physician services related to the treatment of patients with LTBI previously. Most recently, City Council authorized an agreement with UTHSCT for LTBI treatment on March 29, 2018 for an agreement term ending September 30, 2019.

In addition, on February 14, 2019 City Council authorized the acceptance of funding from the Texas Department of State Health (DSHS) for Metro Health's participation in the Tuberculosis Identification and Treatment Project (TB Project) under the Texas Medicaid 1115 Waiver. This project focuses on targeted testing and treatment for LTBI in high risk populations to prevent these infections from evolving into active TB cases. This project is being implemented in partnership with DSHS Region 8, The Texas Center for Infectious Disease (TCID), UT Health and the UTHSCT.

This agreement will provide TB physician services for high risk individuals identified as having LTBI through increased targeted TB testing. Increased testing and treatment focuses on persons at higher risk for contracting TB such as refugees and foreign born individuals, persons living in congregate settings such as homeless shelters and drug rehabilitation centers, and individuals living with HIV and diabetes.

ISSUE:

Metro Health requests City Council authorize an agreement with UTHSCT for TB physician services related to the treatment of patients with LTBI. TB continues to be a significant and expensive public health problem in Texas. TB can strike anyone, but is more likely to be found in those born in a foreign country, people with diabetes, people with HIV/AIDS, the homeless, incarcerated and those that work in health care. Many individuals in this population also are uninsured and lack access to appropriate treatment and care.

The agreement with the University of Texas Health Science Center at Tyler will allow Metro Health to better facilitate treatment for individuals with suspected LTBI.

ALTERNATIVES:

If the agreement is not authorized, Metro Health will need to identify alternative mechanisms to provide expert TB physician services for patients identified in the community with LTBI. In addition, Metro Health will be unable to meet the goals of the DSHS TB Project which aims to increase targeted testing and treatment for LTBI in high risk populations.

FISCAL IMPACT:

An ordinance authorizing an agreement with the University of Texas Health Science Center at Tyler for the San Antonio Metropolitan Health District's Tuberculosis Prevention and Control Program to provide physician

services in an amount up to \$199,052.00 for a period beginning October 1, 2019 and ending September 30, 2021. Funding for this agreement will be supported through the Department of State Health Services TB Project grant funded through the Texas Medicaid 1115 Waiver for an amount not to exceed \$199,052.00. There is no impact to the General Fund.

RECOMMENDATION:

Staff recommends approval of the Ordinance authorizing an agreement with the University of Texas Health Science Center at Tyler for expert TB physician services related to the treatment of patients with active and Latent TB Infection (LTBI).
