Comprehensive Land Use Categories

Land Use Category: "Public Institutional"

Description of Land Use Category: Public/Institutional uses include public, quasi-public, and institutional uses that facilitate the containment or delivery of local, state, or national governmental or non-profit services. The location for these services include where they currently reside, as well as where they best meet the future needs of the community. Examples of public institutional uses include post offices, libraries, schools, fire stations, churches, community gathering facilities, etc.

Land Use Category: "Community Commercial"

Description of Land Use Category: This category provides for medium intensity commercial uses that serve a market on the scale of a community comprised of two or more medium sized neighborhoods. Community commercial uses should be located in a nodal fashion, near the intersection of collectors and arterials, the intersection of two arterials, or along arterials where already established. Examples of community commercial land uses include convenience stores with gasoline, car washes, minor auto repair and servicing, grocery stores up to 65,000 sq. ft., plant nurseries, medium sized restaurants, and community shopping centers. Refuse containers should be located behind the principal structure and screened from adjacent residential uses. Appropriate buffering such as a buffer yard and/or landscaping should form a screen between this category and any residential uses. Shared parking and internal circulation are encouraged with adjacent uses. Whenever possible, revitalized or redeveloped community commercial centers should be designed to create a safe and attractive vehicular and pedestrian movement system that links to adjacent uses.
