Land Use Analysis

Sector Plan Criteria for review:

- The recommended land use pattern identified in the North Sector Land Use Plan inadequately provides appropriate optional sites for the land use change proposed in the amendment.
- The amendment must constitute an overall improvement to the Sector Plan and will not solely benefit a particular landowner or owners at a particular point in time.
- The amendment must uphold the vision for the future of the North Sector Plan.

The applicant requests this plan amendment to change the land use classification from Suburban Tier to Urban Core Tier. The property is currently undeveloped. The owner of the property proposes to develop the property with a Master Planned Community District that includes open space, residential uses, office uses and commercial uses. The amendment will support the creation of employment and business growth opportunities as well as add additional housing stock to the community. The proposed location of multi-family residential and office uses are located to serve as a buffer between the low-density single-family residential uses south of the subject property and the commercial uses to the north. The proposed amendment will increase open space areas along Leon Creek.

The amendment will not adversely impact a portion of, or the entire Planning Area by:

- Significantly altering acceptable existing land use patterns, especially in established neighborhoods.
- Affecting the existing character (i.e. visual, physical, and functional) of the immediate area.
- Creating activities that are not compatible with adjacent neighboring uses, and, particularly, the mission of Camp Bullis.
- Significantly alter recreational amenities such as open space, parks, and trails.

The proposed amendment will be compatible with the existing land use pattern and will appropriately locate commercial and retail uses along a major arterial roadway and will be accessible from IH-10, therefore, the proposed amendment will not change the existing land use pattern nor adversely affect the existing character of the of immediate area. The proposed amendment will allow a master planned community district and will not create activities that are incompatible with Camp Bullis or the adjacent neighboring uses. Camp Bullis has submitted recommendations that will further mitigate any potential negative effects that may occur as a result of the proposed development. Additionally, the amendment will not significantly alter recreational amenities such as open space, parks, and trails but will set aside a portions of the property as open space, especially that along the Leon Creek.

ALTERNATIVES:

1. Recommend denial of the proposed amendment to the North Sector Plan.
2. Make an alternate recommendation.
3. Defer the application to a future date.

FISCAL IMPACT:

None.

RECOMMENDATION: Staff recommends approval. The proposed amendment to Urban Core Tier land use classification is compatible with the North Sector Plan's goal of development of locating retail and commercial uses near the IH-10 highway corridor, focusing high density residential near activity centers and providing buffers between high density and low density development.
