## **ISSUE:**

**Plan Adoption Date:** April 4, 2002

**Update History:** December 6, 2007

Goal 1: Improve the current variety of goods, services and employment available within the community by creating an environment conducive to commercial prosperity and encouraging new businesses to locate in the area.

Goal 1.4: Ensure new and existing businesses conform appropriately to the scale, design and character of the community, enhancing it aesthetically whenever possible.

## **Comprehensive Land Use Categories**

**Low Density Residential:** Low-density residential uses include single-family houses on individual lots. All off-street parking and vehicle use areas adjacent to residential uses require buffer landscaping, and lighting and signage controls. Certain non-residential activities, such as schools, places of worship and parks, are appropriate within these areas and should be centrally located to provide easy accessibility.

### **Example Zoning Districts:**

R3, R4, R5, R6, R20

## **Comprehensive Land Use Categories**

**Community Commercial:** Community Commercial development includes moderate-intensity convenience retail or service uses, generally serving the area community. These uses depend on a greater volume of vehicular traffic. Drive-through establishments are permitted. A mix of uses in the same building or development is allowed. Community Commercial uses are typically located at nodes on arterials at major intersections. Community Commercial uses should incorporate well-defined and accessible entrances, shared internal circulation, limited curb cuts to arterial streets, ample sidewalks, shade trees in parking lots, landscaping on planting strips between parking lot and streets, and well-designed monument signage (no large pole signs). Shared parking is encouraged in order to minimize impervious cover. Community commercial centers should be linked to adjoining land uses with safe, attractive and convenient vehicular and pedestrian access. Appropriate buffering is required if this use abuts a residential use.

### **Example Zoning Districts:**

NC, C1, O1, C2P, C2

## **Comprehensive Land Use Categories**

**Neighborhood Commercial:** Neighborhood Commercial includes small offices and shop-front retail establishments that can be served by pedestrian access, generally less than 5000 square feet. No drive-through establishments are permissible. Residential uses can be in the same building with retail and office uses. This includes small apartment buildings and townhouses. Live/work units and residential units above retail are encouraged. Uses are in scale with the surrounding residential development. Community green areas with benches, trees and landscaping; small plazas; and public gathering spaces are encouraged as part of the neighborhood commercial area. Buildings should have windows on the ground level. Parking areas should be located behind the buildings. Service entrances and/or yards are screened from residential areas and refuse enclosures are located at the rear of the site and screened. Buffer yards provide a landscaped separation between residential and commercial uses. All off street parking and vehicle use areas adjacent to residential uses require buffer landscaping and lighting and signage controls.

NC, C1, O1

2. Make an alternate recommendation.

3. Continue to a future date.

**FISCAL IMPACT:**

None

**STAFF ANALYSIS AND RECOMMENDATION:** Staff recommends Approval. Planning Commission recommends Denial (5-4).

The applicant requests this plan amendment and associated zoning change in order to construct a Family Dollar. The subject property is located within a neighborhood and ¼ of a mile from a premium transit corridor. The surrounding area also has various small scale commercial uses and therefore the proposed Community Commercial and Neighborhood Commercial classification are appropriate land use classifications. The proposed land use is also supported in the Highlands Community Plan to ensure that high quality and appropriate business' are being brought to the area.

Relevant Goals and Policies of the Comprehensive Plan may include:

GCF Goal 1: Higher-density uses are focused within the city's 13 regional centers and along its arterial and transit corridors.

GCF P8: Continue to focus revitalization of neighborhoods adjacent to downtown and extend these efforts to regional centers, urban centers, and transit corridors.

GCF P14: Establish appropriate buffers and transitions (land use, form and/or landscaping) between residential neighborhoods and surrounding higher-density development.

The request is generally consistent with guiding principles of the Comprehensive Plan. The plan calls for a mix of uses to be developed along and near transit corridors. However, the development should avoid negatively affecting adjacent residential land uses by employing appropriate buffers and landscaping. This project will transform the vacant lots in to an appropriately scaled commercial business that will service the neighborhood while preserving the character of the area.
